Toward Sustainable Development? Aug 27 2019 Inspired by a conference held at Columbia U. in March 1992 (though the roster of contributors extends beyond those who participated in the conference), this volume emerges from an attempt to understand development and the resistance to it in the contemporary world. Its subject is the development efforts in the Narmada River valley in central and western India, particularly the Sardar Sarovar Project (SSP). The 17 chapters are organized into seven parts: introduction; overviews of the SSP; histories of resistance to the SSP; resettlement and rehabilitation; technical and environmental concerns and alternatives; the independent review; and politics and development. Paper edition (unseen), \$24.95. Annotation copyright by Book News, Inc., Portland, OR

It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

Shared Waters, Shared Opportunities Dec 12 2020 The importance of watercourses to human life and development cannot be overemphasised. From communication, trade, agriculture and the location of human settlements, they have played an immeasurable role. Almost 60% of Africa lies within shared rivers and lake basins. The Nile is shared by more than seven nations, the Zambezi by six, and the Congo by nine. With populations on the rise, many countries have been labeled 'water scarce' nations, and in fifteen years it is predicted that many people on earth will be exposed to water shortage consequences such as famine and disease. Thirteen African nations already suffer 'water stress' and soon another twelve will join the list unless something is done to thwart the problem. On March 20, 2009 in Nairobi, Hekima College collaborated with Jesuit Hakimani Centre and the French Institute for Research in Africa (IFRA) to host the Hekima College Water Day Academic Seminar with the theme 'Shared Waters, Shared Opportunities'. This book is the result of critical research and presentations by internationally renowned scholars, researchers and experts, and students of the Institute of Peace Studies and International Relations, Hekima College. For most of 2009 Kenya suffered severe problems caused by flooding which took many lives and destroyed homes and important infrastructures. It highlighted the issues of water management and water conflicts, not only in Kenya but in other parts of East Africa, as it was made abundantly clear that not only scarcity of water, but excess water, incorrectly managed, can be disastrous. This timely, scholarly book presents discussions of the issues which underlie the major water crises in the region. They open the debate into the water problems of Kenya and East Africa in an effort to join the global campaign to find solutions to these difficulties.

Mega-Dams and Indigenous Human Rights Oct 10 2020 This original and insightful book explores and examines the impact that building mega-dams has on the human rights of those living in surrounding areas, and in particular those of indigenous peoples who are often most affected. Compiling case studies from around the world, Itzhak Kornfeld provides clear examples of how human rights violations are perpetrated and compounded, with chapters examining historical, recent and ongoing dam projects.

Planning the Management, Operation, and Maintenance of Irrigation and Drainage Systems Jun 17 2021 This paper provides the basis for

the preparation of manuals necessary for managers and staffs to perform needed activities at the proper time. The guide provides a comprehensive list of issues that should be addressed in operation and maintenance manuals for irrigation and drainage systems, and a listing of published materials and working papers which will assist in the formulation of plans for operation and maintenance. The paper serves as a valuable tool to help improve the performance of irrigation and drainage systems and to assist managers in developing and improving effective organizations to serve water consumers better.
