The workbook focuses on the reading and writing (Paper II) components of the CSEC examination. All items are original. The examining body (CXC) consistently reports that students continually perform poorly on the paper II (reading and writing paper) compared to the other papers. It is with these in mind that the author decided to compose a workbook that seeks to expose students to the types of questions and the structure of the exam paper itself, and how they can interpret and manipulate the items from as early as first form; Grade 7. This is the teacher's workbook for the iNecesario! Pre-CSEC Spanish Practice Paper II for the Caribbean Grades 7-9. Libro de Estudiantes accompanies this text.

Cases of Assessment in Mathematics Education Nov 22 2019 The present book, Cases of Assessment in Mathematics Education, is one of two studies resulting from an ICMI Study Conference on Assessment in Mathematics Education and Its Effects. The book which is published in the series of ICMI Studies under the general editorship of the President and Secretary of ICMI is closely related to another study resulting from the same conference: Investigations into Assessment in Mathematics Education (Niss, 1992). The two books, although originating from the same sources and having the same editor, emphasize different aspects of assessment in mathematics education and can be read independently of one another. While the present book is devoted to presenting and discussing cases of assessment that are actually implemented, the other study attempts to critically analyze general and principal aspects of assessment. Naturally, the content of either book is enriched by the materials and perspectives provided by the other one. In order to put this book and its background into context, the nature and scope of the ICMI studies are outlined briefly below.
