Labor and Employment Law Initiatives and Proposals Under the Obama Administration Sep 20 2021 Barack Obama's famous "Blueprint for Change," part and parcel of the campaign that culminated in his historic election as U.S. president in November 2008, openly announced his support for the Employee Free Choice Act (H.R. 1409) suggesting that major change was imminent in U.S. labor and employment law. Although promised legislative change has yet to materialize, there appears to be a growing consensus that the current system for addressing employment disputes in union-

represented and non-union workplaces deserves renewed attention and needs significant restructuring. Thus, the issues taken up by this prominent U.S. conference remain relevant to policy debates which will likely continue to rage in the United States for years to come. Based on papers delivered at the 2009 conference of the New York University School of Law's Center on Labor and Employment Law - the 62nd in this venerable and highly influential series - the book presents articles updated by the authors to reflect more recent developments, as well as new papers to ensure a comprehensive and current analysis of both what has actually changed and which trends seem to be gaining momentum. Twenty-two outstanding scholars and practitioners in U.S. labor law and practice pay special attention to such issues as the following: mandatory arbitration of employment disputes in non-union sector; call for improved administration of the National Labor Relations Act in expediting elections and reinstating discriminatees; more privatized forms of dispute resolution such as arbitration and mediation; card-check and neutrality agreements bypassing government processes; proposed reform of the Age Discrimination in Employment Act; evaluating market-based defenses to pay equity claims; EEOC initiatives in public enforcement of equality law; and challenges to labor relations in state and local governments.

Handbook on the Comprehensive Crime Control Act of 1984 and Other Criminal Statutes Enacted by the 98th Congress Jan 13 2021 "This Handbook has been prepared to assist federal prosecutors and investigators, and others with federal criminal justice responsibilities, in their review and implementation of the Comprehensive Crime Control Act of 1984 (Public Law 98-473) and ten other recently enacted criminal statutes. The Comprehensive Crime Control Act contains the most significant series of changes in the federal criminal justice system ever enacted at one time. Implementation of the Act, and of the other criminal statutes enacted by the 98th Congress, will constitute a major step toward establishing a fair and sensible balance in that system between the rights of the public as a whole and the rights of criminal defendants"--Preface.

*Handbook of Research on Entrepreneurship in Professional Services* Sep 08 2020  
Professional service firms are critical agents of contemporary economies and understanding them has become a central focus of recent scholarship. This very timely and well organized Handbook brings together several leading scholars who explore how we might think and theorize about professional service firms and their entrepreneurial behaviours. The Handbook will become a key source for the growing community of researchers in this area. ð Royston Greenwood, University of Alberta, Canada  
For too long, both researchers and practitioners have presumed that professional service firms follow the status quo when they should better understand how these professionals set the rules for globalization. This Handbook reminds us that professionals are as much the shock-troops of capitalism as the multinational corporations that they serve. As this Handbook shows, the leading firms successfully compete with each other by fostering entrepreneurship and innovation in order to service an institutional system that undergirds the international economy. ð Christopher McKenna, University of Oxford, UK  
Professional services are increasingly seen as an important foundation for future economic growth and prosperity. Yet research on innovative and entrepreneurial processes in professional services has been surprisingly scarce. This Handbook provides a collection of original contributions from leading scholars outlining the current stock of knowledge in the area as well as providing directions for further research. The expert contributors discuss entrepreneurship and innovation from a number of different perspectives, including the entrepreneurial professional team, the entrepreneurial firm and the institutional environment. The first part of the book looks at the challenges of entrepreneurship specific to the professional service firm while the second explores the creation and exploitation of entrepreneurial opportunities in the professional service team. Part III turns to the organization and Part IV to the management and growth of the entrepreneurial professional service firm. The final part discusses the interplay between professions, firms and the institutional environment. Researchers, scholars and PhD students in the areas of entrepreneurship and professional service firms along with advanced students of management will find this volume of great value.
