Thomas F. Torrance Sep 28 2019 This book provides an important study of the theology of Thomas F. Torrance, who is generally considered to have been one of the most significant theologians writing in English during the twentieth century, with a view toward showing how his theological method and all his major doctrinal views were shaped by his understanding of the doctrine of the Trinity. Torrance pursued a theology that was realist because he attempted to think in accordance with the unique nature of the object that is known. In holding to such a methodology, he drew an analogy between theology and natural science. This book demonstrates how, for Torrance, God relates with humanity within time and space so that creation finds its meaning in relation to God and not in itself; this enabled him to avoid many theological pitfalls such as agnosticism, subjectivism and dualism while explaining the positive implications of various Christian doctrines in a penetrating and compelling manner. This book offers an important resource for students of theology and for scholars who are interested in seeing how serious dogmatic theology shapes and should shape our understanding of the Christian life.

[Sexuality in World History](#) Jul 07 2020 This book examines sexuality in the past, and explores how it helps explain sexuality in the present. The subject of sexuality is often a controversial one, and exploring it through a world history perspective emphasizes the extent to which societies, including our own, are still reacting to historical change through contemporary sexual behaviors, values, and debates. The study uses a clear chronological structure to focus on major patterns and changes in sexuality—both sexual culture and sexual behaviors—in the main periods of world history, covering topics including: • The sexual implications of the transition from hunting and gathering economies to agricultural economies; • Sexuality in classical societies; • The postclassical period and the spread of the world religions; • Sex in an age of trade and colonies; • Changes in sexual behaviors and sexual attitudes between 1750 and 1950; • Sex in contemporary world history. This new edition examines these issues on a global scale, with attention to anthropological insights on sexuality and their relationship to history, the dynamics between sexuality and imperialism, sexuality in industrial society, and trends and conflicts surrounding views of sex and sexuality in the contemporary world.

Now updated with a new afterword, *The End of History and the Last Man* is a modern classic.

The Oxford World History of Empire Oct 22 2021 This is the first world history of empire, reaching from the third millennium BCE to the present. By combining synthetic surveys, thematic comparative essays, and numerous chapters on specific empires, its two volumes provide unparalleled coverage of imperialism throughout history and across continents, from Asia to Europe and from Africa to the Americas. Only a few decades ago empire was believed to be a thing of the past; now it is clear that it has been and remains one of the most enduring forms of political organization and power. We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods, such as the relatively short age of European colonialism. The history of empire, as these volumes amply demonstrate, needs to be drawn on the much broader canvas of global history. Volume Two: *The History of Empires* tracks the protean history of political

domination from the very beginnings of state formation in the Bronze Age up to the present. Case studies deal with the full range of the historical experience of empire, from the realms of the Achaemenids and Asoka to the empires of Mali and Songhay, and from ancient Rome and China to the Mughals, American settler colonialism, and the Soviet Union. Forty-five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases.

The Final Trumpet Apr 15 2021 This book is a collection of Christian poetry done in different styles. Some rhyme, some don't, some are fancy & some are in southern dialect. It's just the different voices God uses when He speaks to the author. Our God is a God of many colors. We're all in the same family but we don't all sound or look the same. It would be boring if we did. NOTE FROM AUTHOR: If you can't see Jesus is walking with you— Get out of the way, cause you're blocking the view!

Hegel: Lectures on the Philosophy of World History, Volume I Jun 29 2022 This edition makes available an entirely new version of Hegel's lectures on the development and scope of world history. Volume I presents Hegel's surviving manuscripts of his introduction to the lectures and the full transcription of the first series of lectures (1822-23). These works treat the core of human history as the inexorable advance towards the establishment of a political state with just institutions—a state that consists of individuals with a free and fully-developed self-consciousness. Hegel interweaves major themes of spirit and culture—including social life, political systems, commerce, art and architecture, religion, and philosophy—with an historical account of peoples, dates, and events. Following spirit's quest for self-realization, the lectures presented here offer an imaginative voyage around the world, from the paternalistic, static realm of China to the cultural traditions of India; the vast but flawed political organization of the Persian Empire to Egypt and then the Orient; and the birth of freedom in the West to the Christian revelation of free political institutions emerging in the medieval and modern Germanic world. Brown and Hodgson's new translation is an essential resource for the English reader, and provides a fascinating account of the world as it was conceived by one of history's most influential philosophers. The Editorial Introduction surveys the history of the texts and provides an analytic summary of them, and editorial footnotes introduce readers to Hegel's many sources and allusions. For the first time an edition is made available that permits critical scholarly study, and translates to the needs of the general reader.

World History and the Eonic Effect Jul 19 2021 At a time when theories of evolution are undergoing renewed controversy, the study of the Eonic Effect can break the deadlock, by looking at world history in the light of "evolution". The assumption that evolution occurs at random is the crux of the dispute, and one confused with issues of religion and secularism. We can detect a non-random pattern in the record of civilization itself, to see "evolution in action" on a stupendous scale. We live in the first generations with enough data to detect this phenomenon. In the confusion of evolutionary theories, the

unexpected discovery of deep level structure can allow us to deconstruct "flat history", and assess claims of directionality in evolution. In the process the theory of natural selection applied to human evolution is seen to fail a photo finish test. The book provides a new model for the study of the overlap of history and evolution, and a critique of current views of the descent of man.

Connecting the Dots in World History, A Teacher's Literacy Based Curriculum Oct 10 2020 In his previously written articles and books, Chris Edwards has argued that Teaching should be considered a field that is separate from both the field of Education and from the content area fields. Teaching is a field which synthesizes content and method for classroom application. All of the other major intellectual fields have a canon of works which practitioners can learn from and add to, but Teaching does not. The Connecting-the-Dots in World History: A Teacher's Literacy-Based Curriculum series changes this by showing how effective a teacher-generated curriculum can be. These books can inspire other teachers to create their own curriculums and inspire a change in the way that the public views teachers and teaching.

The Last Things Nov 30 2019 In The Last Things Donald G. Bloesch takes up difficult and sometimes controversial themes such as the coming of the kingdom of God, the return of Jesus Christ, the life hereafter, the millennial hope, the final judgment, hell, heaven, purgatory and paradise. Wrestling with biblical texts that often take metaphorical form, Bloesch avoids rationalistic reductionism as well as timid agnosticism. While he acknowledges mystery and even paradox, Bloesch finds biblical revelation much more than sufficient to illuminate the central truths of a Christian hope articulated throughout the history of the church. The Last Things is not just a review of past Christian eschatology but a fresh articulation of the grace and glory of God yet to be consummated. The triumph of the grace of Jesus Christ and the dawning of hope beckon us to reach out in the power of the Spirit to receive that blessed future and the promise to renew the life of the church universal today.

The End of Money Jun 05 2020 Are we headed toward a global economic collapse? Financial markets are violently unstable worldwide, and the key benchmarks of financial health are rapidly getting worse. Christians know the Bible predicts a coming day when one person will take control of the entire global economy. But how will that happen? We may now have the answers. In fact, the biblical and technological evidence tells us that a cashless society and one-world economy are not only possible, but inevitable. Bestselling author Mark Hitchcock skillfully brings together current research and Bible prophecy to address these important questions: How is the stage being set for economic collapse and a cashless society? What technology will make this cashless world possible? How will the Antichrist control the world economy? What will happen to the people who face all this tumult and chaos? An eye-opening survey of the ways that future events can impact our lives even today.
