Systems Engineering and Safety Jul 19 2021 Enhancing awareness of the interdependence of systems engineering and safety, *Systems Engineering and Safety: Building the Bridge* covers systems engineering methodology, safety tools, and the management needed to build the bridge between these two disciplines. It underscores the relationship between the disciplines and how understanding the relationship can benefit your organization and industry. The book lays out the purpose of the methodology of systems engineering and the tools of safety. It identifies the importance of management and the culture, commitment, communication, and coordination that management must provide. The author describes the systems engineering methodology: the lifecycle, processes, and management and the technical processes that systems engineers and safety professionals must be familiar with. He merges management, systems engineering, and safety into the lifecycle through project processes. Using real-world examples, he also examines the roles and responsibilities of management, and a breakdown theory of safety in the management processes: The Glismann Effect. The strength of this book is that it can be read, understood, and hopefully acted upon by the chief executive officer of a corporation, right down to the line manager of systems engineering or the subject matter expert in the safety department. This value can be measured in cost savings, be it in the form of human, social, or financial capital.

The Metric Tide May 05 2020 ‘Represents the culmination of an 18-month-long project that aims to be the definitive review of this important topic. Accompanied by a scholarly literature review, some new analysis, and a wealth of evidence and insight... the report is a tour de force; a once-in-a-generation opportunity to take stock.’ – Dr Steven Hill, Head of Policy, HEFCE, LSE Impact of Social Sciences Blog ‘A must-read if you are interested in having a deeper understanding of research culture, management issues and the range of information we have on this field. It should be disseminated and discussed within institutions, disciplines and other sites of research collaboration.’ – Dr Meera Sabaratnam, Lecturer in International Relations at the School of Oriental and African Studies, University of London, LSE Impact of Social Sciences Blog Metrics evoke a mixed reaction from the research community. A commitment to using data and evidence to inform decisions makes many of us sympathetic, even enthusiastic, about the prospect of granular, real-time analysis of our own activities. Yet we only have to look around us at the blunt use of metrics to be reminded of the pitfalls. Metrics hold real power: they are constitutive of values, identities and livelihoods. How to exercise that power to positive ends is the focus of this book. Using extensive evidence-gathering, analysis and consultation, the authors take a thorough look at potential uses and limitations of research metrics and indicators. They explore the use of metrics across different disciplines, assess their potential contribution to the development of research excellence and impact and consider the changing ways in which universities are using quantitative indicators in their management systems. Finally, they consider the negative or unintended effects of metrics on various aspects of research culture. Including an updated introduction from James Wilsdon, the book proposes a framework for responsible metrics and makes a series of targeted recommendations to show how responsible metrics can be applied in research management, by funders, and in the next cycle of the Research

Excellence Framework. The metric tide is certainly rising. Unlike King Canute, we have the agency and opportunity – and in this book, a serious body of evidence – to influence how it washes through higher education and research.

Unmooring the Komagata Maru Oct 22 2021 In 1914, the SS Komagata Maru arrived in Vancouver Harbour and was detained for two months. Most of its 376 passengers were then forcibly returned to India. Unmooring the Komagata Maru challenges conventional Canadian historical accounts by drawing from multiple disciplines and fields to consider the international and colonial dimensions of the voyage. By situating South Asian Canadian history within a global-imperial context, the contributors offer a critical reading of Canadian multiculturalism through past events and their commemoration. A hundred years later, the voyage of the Komagata Maru has yet to reach its conclusion.

From Dissertation to Book, Second Edition Mar 03 2020 When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. “You know something!” I would say if it could hear me. “Now tell it to us in language we can understand!” Since its publication in 2005, *From Dissertation to Book* has helped thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing,

this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of *From Dissertation to Book* is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy, whether reading on a page or a screen. Germano also acknowledges that not all dissertations can or even should become books and explores other, often overlooked, options, such as turning them into journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of academic writing, *From Dissertation to Book* reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add “author” to their curriculum vitae.

Hactivism and Cyberwars Oct 10 2020 As global society becomes more and more dependent, politically and economically, on the flow of information, the power of those who can disrupt and manipulate that flow also increases. In *Hactivism and Cyberwars* Tim Jordan and Paul Taylor provide a detailed history of hactivism's evolution from early hacking culture to its present day status as the radical face of online politics. They describe the ways in which hactivism has re-appropriated hacking techniques to create an innovative new form of political protest. A full explanation is given of the different strands of hactivism and the 'cyberwars' it has created, ranging from such avant garde groups as the Electronic Disturbance Theatre to more virtually focused groups labelled 'The Digitally Correct'. The full social and historical context of hactivism is portrayed to take into account its position in terms of new social movements, direct action and its contribution to the globalization debate. This book provides an important corrective flip-side to mainstream accounts of E-commerce and broadens the conceptualization of the internet to take into full account the other side of the digital divide.

Introduction to Psychology Aug 27 2019 "This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"--BCcampus website.
