Flowers of Mountain and Plain (Illustrations) Aug 08 2020 "Flowers of Mountain and Plain" is intended primarily for travelers and flower lovers who wish a short cut to recognizing flowers seen on excursions or from car windows. It may also serve as a souvenir of pleasant summer days or vacation trips. The book consists of the twenty-five color plates to be found in "Rocky Mountain Flowers" (Clements and Clements, 1914), representing one hundred and seventy-five of the most beautiful and striking flowers of the mountains and plains of the West. If it succeeds in opening the eyes of the passer-by to an appreciation of the flowers by the way, or in further stimulating an already awakened interest, it will have served its purpose.

Landscaping with Native Plants of Michigan Mar 27 2022 Landscaping with Native Plants of Michigan is designed for beginning and experienced gardeners who want to learn more about Michigan's unique native-plant communities and how to successfully incorporate them into their home landscapes. It combines the practicality of a field guide with all the basic information homeowners need to create an effective landscape design. The plant profiles section includes comprehensive descriptions of more than 600 native plant species, subspecies, and varieties of flowers, trees, shrubs, vines, evergreens, grasses, and ferns that have grown in Michigan since the time before European settlement. Information on planting, maintenance, and landscape uses for each plant is also included. Readers will also gain many creative ideas from the section featuring Michigan gardeners who have successfully incorporated native plants into their home landscapes.

The Ecology of a Tallgrass Treasure: Audubon's Spring Creek Prairie Dec 12 2020 This book describes the major plant and animal components of Spring Creek Prairie Audubon Center, an 850-acre National Audubon Society tallgrass prairie in Lancaster County, southeastern Nebraska. In addition to providing a species list of the area's plants (368 species), there are comprehensive annotated lists of its birds (240), mammals (43), reptiles (23), and amphibians (10). There are also variably complete annotated lists of the area's butterflies (76), sphinx moths (30), silk moths (7), dragonflies (24), damselflies (11), grasshoppers (9), katydids (11), mantids (2), and walkingsticks (2). Brief profiles of life histories and ecologies of 55 animal and 7 plant species are included, as well as information on nearly 100 public-access native grasslands in eastern Nebraska. The text comprises more than 68,000 words, 400 references, and a glossary of 125 biological/scientific terms as well as more than 40 line drawings by the author.

Indiana Getting Started Garden Guide Jul 07 2020 In *Indiana Getting Started Garden Guide*, internationally renowned gardening expert and Indiana native Shawna Coronado presents foolproof planting advice for over 150 species, handpicked for their ability to flourish in the Hoosier State.

Wildflowers of the Tallgrass Prairie Feb 23 2022 This classic of midwestern natural history is back in print with a new format and new photographs. Originally published in 1989, *Wildflowers of the Tallgrass Prairie* introduced many naturalists to the beauty and diversity of the native plants of the huge grasslands that once stretched from Manitoba to Texas. Now redesigned with updated names and all-new photographs, this reliable field companion will introduce tallgrass prairie wildflowers to a new generation of outdoor enthusiasts in the Upper Midwest. Each species account is accompanied by a brilliant full-page color photograph by botanist Thomas Rosburg. In clear, straightforward, and accessible prose, authors Sylvan Runkel and Dean Roosa provide common, scientific, and family names; the Latin or Greek meaning of the scientific names; habitat and blooming times; and a complete description of plant, flower, and fruit. Particularly interesting is the information on the many ways in which Native Americans and early pioneers used these plants for everything from pain relief to dyes to hairbrushes. Runkel and Roosa say that prairies can be among the most peaceful places on earth; certainly they are

among the most beleaguered. Wildflowers of the Tallgrass Prairie will inspire both amateurs and professionals with the desire to learn more about the wonders of the prairie landscape.

Prairie Time Apr 27 2022 In the rush of modern life, we measure our lives by the clock, the calendar, the timetable. But there are older rhythms in nature: the call of chickadees before the first hint of spring, the golden face of a compass plant in July, the first snowfall. These signs mark the passage of time in a world that Aldo Leopold knew well and eloquently described. With notebook and camera in hand, John and Beth Ross revisit the Aldo Leopold Memorial Reserve in south-central Wisconsin fifty years after Leopold's death. Thanks to the efforts of Leopold, his family, and the Leopold Foundation, this once-ruined farmland is now largely restored to a natural state. The Rosses explore the terrain of this sandy land, encounter its natural citizens, and relate life here to its physical underpinnings. Following Leopold's own practice of phenology, they note the seasonal changes: arrivals and departures of wild geese, the blossoming of the pasque flower at the edge of melting snow, the appearance of monarch butterflies on the milkweed. And further, they seek to find in this landscape an underlying morality, a communion of understanding, a sense of place in the cosmos. Beautifully illustrated with color photographs, the book also includes notes on the behavior, habitat, and human interactions with ninety-four species of plants, birds, and other animals found in the reserve. An extensive glossary explains terms from geology, ecology, meteorology, and related life and earth sciences.

Climates of Hunger Jan 13 2021 In recent years, world climate changes have drawn more attention than at any other time in history. What we once called "crazy weather," just a few years ago, is now beginning to be seen as a part of a logical and, in part, predictable pattern, an awesome natural force that we must deal with if man is to avoid disaster of unprecedented proportions. *Climates of Hunger* is a book of paramount importance for our time. It will be essential reading not only for professionals in the field—including agricultural meteorologists, political scientists, geographers, sociologists, and business counselors—but for all who are concerned in any way with environmental trends, world and domestic food supplies, and their effects on human institutions.

The Prairie in Seed Nov 10 2020 In *The Prairie in Seed*, Dave Williams shows us how to identify wildflowers when they are out of bloom and, in particular, how to harvest their seeds. Without the flower color and shape as guides, it can be difficult to identify prairie plants.

Imagine trying to distinguish between a simple prairie sunflower and an ox-eye sunflower with no flowers to look at! In this richly illustrated guide, Williams offers dormant plant identification information, seed descriptions, and advice on seed harvesting and cleaning for seventy-three of the most common wildflowers found in the tallgrass prairie. He includes photographs and descriptions of the plants in bloom and in seed to assist in finding them when you are ready to harvest. Each species description explains where the seeds are located on the plant, when seed ripening begins, and how many seeds each species produces, along with a photograph and approximate measurements of the actual seed. Finally, this guide provides assistance on how and when to hand-harvest seeds for each species, as well as some simple tips on seed cleaning.
