Industrial Policy in Eastern Europe Apr 15 2021
The political revolutions since mid-1989 in the eastern part of Europe have ushered two ambitions into the purview of the new political leaders of most transition economies: pluralistic political democracy and a market economy based overwhelmingly on private property and self-interest, with a minimal role for the state. Whereas it may be appropriate to confine the state's role in economic affairs to the provision of public goods and ensuring property rights once a fully-fledged market economy in these countries will be functioning, the path leading up to fulfilling this ambition for now, will have to be steered by the state, provided governance capabilities can be mustered within these countries and perhaps with international assistance. *Industrial Policy in Eastern Europe: Governing the Transition* argues the urgency of mobilizing whatever governance capabilities are available to steer the transformation processes towards positive growth, including through proper use of state-owned assets for as long as they cannot be privatized or fully transformed into parastatals, like in Western Europe.

Educating Engineers for Future Industrial Revolutions Nov 30 2019
This book contains papers in the fields of engineering pedagogy education, public-private partnership and entrepreneurship education, research in engineering pedagogy, evaluation and outcomes assessment, Internet of Things & online laboratories, IT & knowledge management in education and real-world experiences. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to these new needs. There is also pressure by the new situation in regard to the Covid pandemic. These were the aims connected with the 23rd International Conference on Interactive Collaborative Learning (ICL2020), which was held online by University of Technology Tallinn, Estonia from 23 to 25 September 2020. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning. Nowadays the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy. In this way, we try to bridge the gap between 'pure' scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, learning industry, further and continuing education lecturers, etc.

On the Question of Truth in the Era of Trump Sep 20 2021
Utilizes critical theory perspectives to examine the construction

of truth and relativism with a focus on the role of the media in the wake of the 2016 election.

 Procurement 4.0 and the Fourth Industrial Revolution Apr 03 2020 We are living in the middle of a Fourth Industrial Revolution, with new technology leading to dramatic shifts in everything from manufacturing to supply chain logistics. In a lively, developing field of academic, procurement is often neglected. Despite this, procurement plays a vital role, connecting the organization with its ecosystem. At a time of change and economic crisis, a new business model is called for, which this book aims to define. Based on the applications of Industry 4.0 concepts to procurement, this book describes Procurement 4.0 as a method and a set of tools, helping businesses to improve the value of their products, reduce waste, become more flexible, and address the business needs of the future. It will appeal to academics in the area, as well as practitioners.
 Investigation of Concentration of Economic Power: Milk industry. Poultry industry. Mar. 9-11, May 1-3, 1939, vii, 2751-3282, xviii p^^^^ Jan 13 2021 Continuation of investigation of economic concentration in industry and commerce; pt.5A: Contains FTC report on industry monopolistic practices; pt.15A Contains report on marketing practices in the retail distribution of motor fuel and motor lubricant products; pt.17A: Contains replies of oil companies to the committee questionnaire on financial data and related topics.
