[Star Marshals](#) Jul 31 2020 Since the invention of radio broadcast humans had become noisy. Luckily for the citizens of Earth a benevolent species of alien, known as Bopecans, had been the first to hear the noise. Once they arrived the Bopecans explained that others were out there, they too would be coming and not all of them would be as well intentioned as the Bopecans. Humans needed to be ready. They helped the human race establish an agency to police the solar system and pursue fugitives of it. This agency became known as Star Marshals. Now, nearly forty years after their inception, vague messages have arrived from a mysterious source. These cryptic messages indicate a potentially monumental threat to our solar system. A pair of marshals are dispatched to the moons of Jupiter to investigate. Star marshals Todd Jordan and Simon Cain have been best friends since college. Now, a first time father to a six month old baby girl, Simon is heading out on his first assignment back after paternity leave. After much soul searching, Simon has decided that this will be his last Off Earth Assignment (O.E.A). What he is uncertain of is how his best friend and partner Todd will take the news.

**Dreaming Of Jupiter** Oct 26 2022 Ted Simon is the author of the classic travel book JUPITER'S TRAVELS. It documents his four-year journey round the world by motorbike, travelling through Europe, Africa, South and North America, and Asia. A number one bestseller in the late 1970s, it is still regarded as one of the greatest motorcycle books - indeed, one of the greatest travel books - ever written. In 2001, at the age of 69, Ted Simon decided to retrace his journey, and DREAMING OF JUPITER is the result. It took him two and a half years - during which time he revisited all the countries he had travelled through in the 1970s. He found much had changed, and he reflects upon the increased poverty, political upheavals, environmental issues and indeed the changes in himself. But ultimately, DREAMING OF JUPITER is a hugely inspiring read with a positive message at its heart - that even at the age of 70 you can still set off on an adventure, and be surprised and excited by what life throws at you along the way.

**XMM-Newton X-Ray Observation of Jupiter** Jun 17 2019 Soft X-ray emission has been observed from the disk of both Jupiter and Saturn as well as from the auroral regions of these planets. The low-latitude disk emission as observed by ROSAT, the Chandra X-Ray Observatory, and XMM-Newton appears to be uniformly distributed across the disk and to be correlated with solar activity. These characteristics suggest that the disk x-rays are produced by: (1) the elastic scattering of solar X-rays by atmospheric neutrals and (2) the absorption of solar X-rays in the carbon K-shell followed by fluorescent emission. The carbon atoms are found in methane molecules located below the homopause. In this paper we present the results of calculations of the scattering albedo for soft x-rays. We also show the calculated x-ray intensity for a range of atmospheric abundances for Jupiter and Saturn and for a number of solar irradiance spectra. The model calculations are compared with recent x-ray observations of Jupiter and Saturn. We conclude that the emission of soft x-rays from the disks of Jupiter and Saturn can be largely explained by the scattering and fluorescence of soft x-rays. We suggest that measured x-ray intensities from the disk regions of Jupiter Waite, J. [Jupiter](#) Jan 17 2022 This comprehensive volume authoritatively describes our understanding of the complex and fascinating jovian system. Written by a team of world experts, it brings together every aspect of the giant planetary system, from the deep interior of Jupiter to the distant tiny satellites and swarms of escaping gas and dust. Chapters present a synthesis of experimental data from the Voyager, Galileo and Cassini missions, from telescopes on the ground and in space, and from theoretical models on the different components that make up the Jupiter system. This book is a valuable introduction for graduate students and an indispensable resource for all researchers in planetary science.

[The Moons of Jupiter](#) Sep 25 2022 THE WINNER OF THE NOBEL PRIZE IN LITERATURE The characters who populate an Alice Munro story live and breathe. Passions hopelessly conceived, affections betrayed, marriages made and broken: the joys, fears, loves and awakenings of women echo throughout these twelve unforgettable stories, laying bare the unexceptional and yet inescapable pain of human contact.

**Galileo's Planet** Oct 22 2019 Since the earliest times one of the brightest lights in the heavens has been that of Jupiter, mythical king of the gods and the largest planet in the solar system. It was only natural that peoples from the dawn of history would be interested in such a planet and, indeed, Jupiter was one of the first objects to be observed with the telescope. Even today Jupiter captures the public interest like no other planet: a vast gaseous world, home to violent storms (larger than the Earth) that have raged for centuries. Galileo's Planet: Observing Jupiter before Photography presents the history of humankind's quest to understand the giant planet in the era before photography, a time when the only way to observe the universe was with the human eye. The book provides a comprehensive and fascinating account of the people involved in this quest, their observations, and the results of their findings. Many of the planetary features studied in detail by today's space probes were once glimpsed by keen-eyed, amateur astronomers. These Earth-bound explorers made up for their modest instruments and viewing conditions with their patience, perseverance, and passion for the night sky. Their greatest challenge was the fifth planet from the Sun and the search for its imagined surface-a revelation of the "real Jupiter." In the process, these part-time observers redefined the meaning of the word "planet." The book recounts their story from the earliest times right up until the invention of the camera.

**14 Fun Facts About the Ring Moons of Jupiter: A 15-Minute Book** May 09 2021 There are eight regular satellites in orbit around Jupiter. These are moons that formed within the gravity field of Jupiter. They were formed at the same time and out of the

same material as the planet itself. They have circular orbits and orbit in the same direction as the planet. The four largest are the Galilean moons. These are the ones seen from any telescope on Earth. But there are four more moons. These little known moons are odd shaped. They orbit close to the planet, providing the material that makes up Jupiter's ring system. In order from Jupiter they are Metis, Adrastea, Amalthea and Thebe. This book is about these four moons. How much do you know about these moons? Do you know: How many rings does Jupiter have? How do these moons make the rings of Jupiter? What happens to Jupiter's rings? How big are the craters on Amalthea? What is the reddest object in our solar system? And much more. Find out the answers to these questions and more and amaze your family and friends with these fun facts. Ages 8 and up. All measurements in American and metric. Educational Versions include exercises designed to meet Common Core standards. LearningIsland.com believes in the value of children practicing reading for 15 minutes every day. Our 15-Minute Books give children lots of fun, exciting choices to read, from classic stories, to mysteries, to books of knowledge. Many books are appropriate for hi-lo readers.

**Red Hell of Jupiter** Feb 18 2022 Armchair Fiction presents extra large editions of classic science fiction double novels. The first novel, "The Crispin Affair" is grand interplanetary adventure by well known sci-fi author, Jack Sharkey. It was a race through outer space. When Morgan Blane first heard Lora Merrick's tale of woe he didn't believe it. Stolen maps and stolen mines on a distant planet? It sounded like the stuff right out of an old B-western movie plot! "Please, Mister. Help a poor damsel in distress won't you?" Right. But when a shady attorney showed up (a notoriously shady attorney who had his "pals" with him) an interplanetary land grab was in the making. Now the race was on and Morgan was throwing in with the beautiful Miss Merrick. Who would be the first to lay claim to the fabled wealth on planet Crispin? The second novel is an oldie but a goodie by sci-fi veteran, Paul Ernst. "The Red Hell of Jupiter" deals with alien terror beneath the clouds of Jupiter. There was something mysterious going on inside Jupiter's gigantic "Red Spot." Earth space ships were sent there, only to vanish without a trace. It was a mystery that defied explanation. But how was this scientific wonder connected to these strange disappearances? Two determined members of the Planetary Exploration Forces took up the task of finding out. As they hurtled headlong through the void, little did they realize that their fates would soon lie in the hands of a menacing alien race. Here is a nail-biting tale of outer space adventure, direct from the pages of "Astounding Stories," all the way back in the early 1930s.

Skeleton Men of Jupiter Oct 02 2020 Skeleton Men of Jupiter was first published in Amazing Stories in 1943. Intended as the first in a series of novelettes to be later collected in book form, in the fashion of Llana of Gathol, it ends with the plot unresolved, and the intended sequels were never written. Several other writers have written pastiche endings for the story.

**The Moons of Jupiter** May 21 2022 More than one hundred full-color photographs, from NASA's Galileo mission to the solar system's largest planet, capture the Jovian planet and its diverse moons, including Io, with its active volcanoes; Europa, an icy world that may hide a subterranean sea; the magnetic Ganymede; Callisto, one of the oldest bodies in the solar system; and others. 15,000 first printing.

Outpost of Jupiter Aug 24 2022 Bob Wilson's ability to communicate with newly discovered aliens from Jupiter may determine whether or not the colony on Ganymede can survive.

**A Lovely Failure (Book 3 of "Visions of Jupiter")** Jul 11 2021 Banned to a remote outlying planet thought devoid of anything useful, Charles finds an agreeable paradise run by women. He isn't exactly motivated to carry out his mission to exploit the planet. When the Home World sends a colleague to check on him, that threatens everything--including the planet itself. He needs to warn the Queen. ~~~~~ Excerpt ~~~~~ Charles woke to a gorgeous morning. His lovely Rakell lay stretched out beside him, her coppery body naked. Lazily he stroked the pale green line that ran down the center of her back until she woke. She raised her head and smiled at him and he knew she was waiting for his signal before reaching for the button to alert Andy. He stretched languidly and considered whether he would make love to her now or after breakfast. Decisions, decisions, he thought contentedly. The delightful choices the day offered competed in his sleepy brain. Andy would have a delicious breakfast ready by the time he got up and showered and Rakell wasn't going anywhere. With a sigh, he opted to have his breakfast first this morning. When he walked into the garden, Andy promptly served a sumptuous breakfast of fruit and juice. As he ate, he lounged in his comfortable chair and took in the lush scenery that surrounded him. His domain. It belonged to the Queen, of course, everything did, but was his to enjoy and use. This entire part of the planet was a garden; calling the space around him a garden was a conceit of his. It was also his delight. Everyone took pains to see that it was always precisely what he wanted. Although most plant life seemed to flourish on their own, Charles could help but be amazed at the way his gardener, Amos, arranged a variety of colorful plants and stones to create a perfect ambience for relaxation. Amos put the best gardeners on Charles's home planet to shame. In subtle ways, he changed the view daily, somehow always managing to create the perfect atmosphere, the one that captured Charles's mood exactly. Captures my mood or influences my moods? Charles thought absently. However it worked, there was a rapport between the two that enhanced his breakfast and set the tone for the day. He sighed with delight as he watched Rakell put a succulent piece of fruit into her mouth. He noted that when she bit into it, the juice ran down her fingers, and he reached over to take her hand and lick the fingers. "You have some official business this morning," she said in his language, her voice delighting him with the odd spins it gave to rather ordinary words. "Ah King will be here soon." "Business? Official business?" This was unusual. "You know I am always happy to see Ah King, but won't the business matters keep?" he asked, surprised and mildly irritated. The news was confusing and threw his entire schedule off. "Does it have to be this morning? Even if it is something urgent, next week should do fine." Her fingers slipped a luscious slice of something that reminded him of mango into his mouth. "He said it has to do with the next ship," she said, looking tired. He knew that speaking his crude language was a strain for her; she used it rarely--only when she seemed to be struck by some sudden and strange desire to practice. He wanted to ask her more, but noted that her lovely orange pupils had begun to glow. It had taken him some time, but ultimately he had learned to read a few of the rather complex Denrien body-language signals. They were an important part of their communications and he had seen this one often enough to know it meant that she knew no more about the subject and wasn't the least interested in learning more. Further information would have to come from Ah King.

**Moons of Jupiter** Nov 22 2019 People on the Earth have been looking for a long time for human-type life elsewhere in the solar system. Recently, all scientific eyes have been looking for it on a moon of Jupiter called Europa. Europa is the sixth closest moon of Jupiter. This book is about a voyage from Earth to Europa, to look more closely at Europa. It is about astronaut Dorothy, who makes the trip, her ex-husband, Hal, who bets big-time on the duration of the trip, and their adult son, Freddy.

**Superman and the Trials of Jupiter** Mar 27 2020 Can Superman evict Darkseid and his servants from Jupiter and its moons?

**Jupiter** Nov 03 2020 Majestic and untwinkling, Jupiter is the grandest of all planets. It is the largest planet in our solar system and among the brightest objects in the night sky. It shines with a noble, steady luster, and its calming presence has inspired humans for centuries. Jupiter was the "beloved star" of the first serious observers of the planets, the ancient Sumerians and Babylonians, and has inspired poetic utterances from eminent writers such as William Wordsworth and Walt Whitman. It also continues to inspire contemporary astronomers and stargazers, and this beautifully illustrated volume brings our understanding of Jupiter right up to date. The scientific study of Jupiter is at a watershed: NASA's Juno space probe has entered orbit about Jupiter to investigate the planet, while information gleaned from improved telescopes and other robotic explorers in space continues to improve our understanding of the planet's origin, evolution, and composition. Jupiter provides a concise and expert overview of the history of our observations of this largest of planetary spheres, as well as reports on the much-anticipated initial findings from the Juno space probe. Also incorporating other recent research that is not widely available, Jupiter is an accessible and engaging introduction to planetary science that will deepen our knowledge both of this magnificent planet and of our own place in the solar system.

**How the Crown Prince of Jupiter Uuidid the Universe, or, The Full Fruit of Love's Full Folly** Sep 01 2020 Once upon a time the Crown Prince of Jupiter glimpsed a miniature of Esmerelda, Princess of the Sun, and fell instantly in love. But was that really such a good idea? At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**The Enemies of Jupiter** Jun 22 2022 Jonathan and his friends are called to Rome by the emperor in the winter of 80 A.D. to find the new Prometheus believed to have brought an epidemic to the city, but Jonathan, obsessed with reuniting his parents, makes some unwise--and life-threatening--ch

**Ultraviolet Observations of Jupiter** Mar 19 2022

**Jupiter** Jul 19 2019 With the increasing sensitivity of the equipment available to the home astronomer, and increasing interest in celestial bodies, this Springer series is a huge helping hand to skywatchers who want to hone their skills. Astronomers' observing guides provide up-to-date information for amateur astronomers who want to know all about what it is they are observing. This is the basis of the first part of the book. The second part details observation techniques for practical astronomers, working with a range of different instruments. The book reviews the latest findings and satellite observations of Jupiter, as well as presenting superb pictures of Jupiter taken by McAnally himself, who proceeds to explain to the reader how to arrive at such beautiful results.

**Jupiter Odyssey** Sep 20 2019 Focusing on the Galileo Mission, the story will relate this remarkable spacecraft's protracted gestation and the ordeal of its long haul out to Jupiter and its ultimate triumph: 5 years exploration within the Jovian system. The story spans a full quarter of a century, drawing on the press conferences, technical papers and essays of engineers and scientists involved in the mission which provide a real sense of participation as the discoveries poured in - it will bring the mission of the Galileo spacecraft to life and provide a more engaging account than would simply be achieved by recounting scientific results. The book will conclude with a snapshot "look ahead" into the Cassini flyby of Jupiter in December 2000 shortly after publication - the book released to coincide with this media event.

**Distant Encounters** Jun 29 2020 An account of the Voyager space flights discusses the successful results of the missions in terms of the acquisition of new data concerning the planets of Jupiter and Saturn.

**The Red Hell of Jupiter** Apr 08 2021 What is the mystery centered in Jupiter's famous "Red Spot"? Two fighting Earthmen, caught by the "Pipe-men" like their vanished comrades, soon find out. Paul Ernst delivers a classic science fiction tale, filled with adventure and wonder!

**Io After Galileo** Aug 12 2021 This is the only book solely about Jupiter's moon Io, the most volcanically active body in the solar system. Written by experts in the field, many of whom took part in the Galileo mission, the book reviews the basics about Io and its unique space environment. Coverage includes all subjects, where the Galileo mission has shed new light on, with some emphasis on Io's most remarkable characteristics: its active volcanism.

**Modern Classics Moons of Jupiter** Dec 04 2020 "Munro's work endures-its wholeness of vision, its complexity of feeling, its tolerance of mind." —Lorrie Moore The characters who populate an Alice Munro story live and breathe; in the finely drawn detail of their lives we find a reflection of ourselves. Passions hopelessly conceived, affections betrayed, marriages made and broken: the joys, loves, and awakenings of women echo throughout these twelve unforgettable stories, laying bare the unexceptional and yet inescapable pain of human contact. From the opening story exploring family relations to the poignant story that closes the collection, this is "vintage Munro."

**Leviathans of Jupiter** Apr 27 2020 In Ben Bova's novel JUPITER, physicist Grant Archer led an expedition into Jupiter's hostile planetwide ocean, attempting to study the unusual and massive creatures that call the planet their home. Unprepared for the hostile environment and crushing pressures, Grant's team faced certain death as their ship malfunctioned and slowly sank to the planet's depths. However one of Jupiter's native creatures--a city-sized leviathan--saved the doomed ship. This creature's act convinced Grant that the huge creatures were intelligent, but he lacked scientific proof. Now, several years later, Grant prepares a new expedition to prove once and for all that the huge creatures are intelligent. The new team faces dangers from both the hostile environment and from humans who will do anything to make sure the mission is a failure, even if it means murdering the entire crew. One of Library Journal's Best SF/Fantasy Books of 2011 At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
