The Road Investment Analysis Model: Case study applications Jul 31 2022

Sub-Saharan African Textile and Apparel Inputs: Potential for Competitive Production, Inv. 332-502 Mar 15 2021

Food and Agriculture in Ethiopia Nov 10 2020 The perception of Ethiopia projected in the media is often one of chronic poverty and hunger, but this bleak assessment does not accurately reflect most of the country today. Ethiopia encompasses a wide variety of agroecologies and peoples. Its agriculture sector, economy, and food security status are equally complex. In fact, since 2001 the per capita income in certain rural areas has risen by more than 50 percent, and crop yields and availability have also increased. Higher investments in roads and mobile phone technology have led to improved infrastructure and thereby greater access to markets, commodities, services, and information. In *Food and Agriculture in Ethiopia: Progress and Policy Challenges*, Paul

Dorosh and Shahidur Rashid, along with other experts, tell the story of Ethiopia's political, economic, and agricultural transformation. The book is designed to provide empirical evidence to shed light on the complexities of agricultural and food policy in today's Ethiopia, highlight major policies and interventions of the past decade, and provide insights into building resilience to natural disasters and food crises. It examines the key issues, constraints, and opportunities that are likely to shape a food-secure future in Ethiopia, focusing on land quality, crop production, adoption of high-quality seed and fertilizer, and household income. Students, researchers, policy analysts, and decisionmakers will find this book a useful overview of Ethiopia's political, economic, and agricultural transformation as well as a resource for major food policy issues in Ethiopia. Contributors: Dawit Alemu, Guush Berhane, Jordan Chamberlin, Sarah Coll-Black, Paul Dorosh, Berhanu Gebremedhin, Sinafikeh Asrat Gemessa, Daniel O. Gilligan, John Graham, Kibrom Tafere Hirfrfot, John Hoddinott, Adam Kennedy, Neha Kumar, Mehrab Malek, Linden McBride, Dawit Kelemework Mekonnen, Asfaw Negassa, Shahidur Rashid, Emily Schmidt, David Spielman, Alemayehu Seyoum Taffesse, Seneshaw Tamiru, James Thurlow, William Wiseman.

Human Rights in Developing Countries Apr 03 2020 This edition of the "Yearbook on Human Rights in Developing Countries" contains contributions on the role of the right to development in the development assistance policies of Norway and of the European Union. These thematic studies will help to provide a better perspective on the place of the right to development, a human right which was recognised by the General Assembly of the United Nations back in 1986. The Yearbook also contains seven country reports, which assess human rights trends in countries in the South, covering civil and political as well as economic, social and cultural rights during the period 1993-1995. The reports follow a common structure to allow for comparisons

among countries. The present volume contains reports on Bhutan, Egypt, El Salvador, Ethiopia, India, Mexico and Uganda. The "Yearbook on Human Rights in Developing Countries" is a joint project of the Chr. Michelsen Institute, Bergen; the Danish Centre of Human Rights, Copenhagen; the Norwegian Institute of Human Rights, Oslo; the Raoul Wallenberg Institute of Human Rights and Humanitarian Law, Lund; the Ludwig Boltzmann Institute of Human Rights (BIM), Vienna; and the Netherlands Institute of Human Rights (SIM), Utrecht.

Landmine Monitor Report Jun 25 2019

Technical report May 17 2021 Nordic Green to Scale for countries zooms in on two regions: Kenya and Ethiopia in East Africa and the Baltic States, Poland and Ukraine in Europe. This report presents the emission reduction potential of 10 selected solutions for the African target countries. The study highlights the costs, savings and co-benefits of implementing the solutions as well as makes policy recommendations for capturing the potential. The technical analysis was conducted by Stockholm Environment Institute (SEI) Africa Centre in close collaboration with African organisations and networks on key environmental and development issues. The project was carried out by the Finnish Innovation Fund Sitra, together with partners CICERO, CONCITO and Institute of Sustainability Studies at the University of Iceland. The project is part of the Nordic Council of Ministers' Prime Ministers' Initiative Nordic Solutions.

Information and Communication Technology for

Development for Africa Aug 20 2021 This book constitutes the proceedings of the First International Conference on Information and Communication Technology for Development for Africa, ICT4DA 2017, held in Bahir Dar, Ethiopia, in September 2017. The 31 revised full papers presented were carefully reviewed and selected from 72 submissions. The papers address the impact of ICT in fostering economic development in Africa. In detail they cover the following topics: e-services, natural language

Global Status Report on Road Safety 2018 Jan 25 2022 The Global status report on road safety 2018 launched by WHO in December 2018 highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians cyclists and motorcyclists in particular those living in developing countries. The report suggests that the price paid for mobility is too high especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.

Annual Report - Bureau of Public Roads Oct 02 2022

Global Status Report on Road Safety 2015 Sep 01 2022 "The Global status report on road safety 2015, reflecting information from 180 countries, indicates that worldwide the total number of road traffic deaths has plateaued at 1.25 million per year, with the highest road traffic fatality rates in low-income countries. In the last three years, 17 countries have aligned at least one of their laws with best practice on seat-belts, drink-driving, speed, motorcycle helmets or child restraints. While there has been progress towards improving road safety legislation and in making vehicles safer, the report shows that the pace of change is too slow. Urgent action is needed to achieve the ambitious target for road safety reflected in the newly adopted 2030 Agenda for Sustainable Development: halving the global number of deaths and injuries from road traffic crashes by 2020. Made possible through funding from Bloomberg Philanthropies, this report is the

Economic and Financial Analysis of Infrastructure Projects

Jul 19 2021 Economic and Financial Analysis of Infrastructure Projects (An Edited Volume) is a practical guide and explains step by step methods to carry out an economic or financial analysis for infrastructure projects. It is a unique collection of eleven major infrastructure projects funded World Bank, ADB, AFD different ministries of Government of India, Government of Kenya, Sultanate of Oman and Government Bangladesh. Economic analysis for certain projects has been carried out with reference to projects in similar conditions. There are total eleven chapters in the book and each chapter is based on a real consultancy project as well as a research paper published in international journal. Each chapter deals with complex mathematical calculations in lucid and precise manner, which readers will find interesting. The book envisioned to cater the requirements of master's and undergraduate management, economics and commerce students studying the subject Project Analysis, Project Management, Development Planning and Project Analysis. This book can be used as a practical guide on project analysis and project management by professional economists and financial experts working in industry. The book is expected to help the researchers and academicians to understand practical application of economics, finance and project management concepts to carry out an economic or financial analysis.

State of the Art in Ethiopian Church Forests and

Restoration Options Sep 08 2020 This book, with contributions from leading academics - and including reviews and case studies from Ethiopian Church forests - provides a valuable reference for advanced students and researchers interested in forest and other

natural resource management, ecology and ecosystem services as well as restoration options. The book addresses various aspects including a general overview of Ethiopian church forests, the present role and future challenges of church forests. It also discusses their structure and diversity in the context of sustainability and discusses restoration options for surrounding landscapes, under consideration of the circumstances of the land and the needs of surrounding communities. The intended readership includes natural resource professionals in general as well as forestry professionals in particular (practitioners, policymakers, educators and researchers). The book will provide the reader with a good foundation for understanding Ethiopian forest resources and restoration options of degraded landscape.

Strategies and Priorities for African Agriculture Oct 29 2019

In the first decade of the twenty-first century, countries within Sub-Saharan Africa reached milestones that seemed impossible only ten years ago: macroeconomic stability, sustained economic growth, and improved governance. Continuing this pattern of success will require enhancing the region's agricultural sector, in which a large proportion of poor people make a living. The authors of *Strategies and Priorities for African Agriculture: Economywide Perspectives from Country Studies* argue that, although the diversity of the region makes generalization difficult, increasing staple-crop production is more likely to reduce poverty than increasing export-crop production. This conclusion is based on case studies of ten low-income African countries that reflect varying levels of resource endowments and development stages. The authors also recommend increased, more efficient public investment in agriculture and agricultural markets and propose new directions for future research. The last ten years have been an encouraging time for one of the world's poorest regions; this book offers an analysis of how recent, promising trends can be sustained into the future.

Diagnosing Corruption in Ethiopia Jan 01 2020 This is a study of the nature of corruption in Ethiopia. It maps eight key sectors. The diagnostics strongly suggest that, in Ethiopia, corrupt practice in the delivery of basic services is potentially much lower than other low-income countries, but that there are emerging patterns in sector level corruption.

Handbook of Research on Sustainable Development and Governance Strategies for Economic Growth in Africa Mar 03 2020 Despite increasing reports across the globe on renewable development and maintenance, little is known regarding what strategies are required for improved economic growth and prosperity in Africa. Improving an understanding of the methods for promoting growth through reusable resource development and administration is a vital topic of research to consider in assisting the continent's development. The Handbook of Research on Sustainable Development and Governance Strategies for Economic Growth in Africa provides emerging research on the strategies required to promote growth in Africa as well as the implications and issues of the expansion of prosperity. While highlighting sustainable education, pastoral development pathways, and the public-sector role, readers will learn about the history of sustainable development and governmental approaches to improving Africa's economy. This publication is a vital resource for policy makers, research institutions, academics, researchers, and advanced-level students seeking current research on the theories and applications of development in societal and legal institutions.
