*Be More Chill* Aug 10 2020 One boy's exploration of what it takes to be "cool", how to get a girl and what (not) to do when you've got one...

*Reshma Saujani* Sep 22 2021 Reshma Saujani is an attorney and the first Indian American woman to run for US Congress. She later founded Girls Who Code to help close the gender gap in technology. This inspiring biography shares Saujani's story.

Pay Up Sep 10 2020 INSTANT NATIONAL BESTSELLER The founder of Girls Who Code and bestselling author of *Brave, Not Perfect* confronts the "big lie" of corporate feminism and presents a bold plan to address the burnout and inequity harming America's working women today. We told women that to break glass ceilings and succeed in their careers, all they needed to do is dream big, raise their hands, and lean in. But data tells a different story. Historic numbers of women left their jobs in 2021, resulting in their lowest workforce participation since 1988. Women's unemployment rose to nearly fifteen percent, and globally women lost over \$800 billion in wages. Fifty-one percent of women say that their mental health has declined, while anxiety and depression rates have skyrocketed. In this urgent and rousing call to arms, Reshma Saujani dismantles the myth of "having it all" and lifts the burden we place on individual women to be primary caregivers, and to work around a system built for and by men. The time has come, she argues, for innovative corporate leadership, government intervention, and sweeping culture shift; it's time to Pay Up. Through powerful data and personal narrative, Saujani shows that the cost of inaction—for families, for our nation's economy, and for women themselves—is too great to ignore. She lays out four key steps for creating lasting change: empower working women, educate corporate leaders, revise our narratives about what it means to be successful, and advocate for policy reform. Both a direct call to action for

business leaders and a pragmatic set of tools for women themselves, Pay Up offers a bold vision for change as America defines the future of work.

The only person who can create a life you'll love is you. Our grandmothers fought for the right to work. Our mothers fought for the choice to be in an office or to stay at home. Our generation is the first to fully embrace and celebrate the fact that our lives are multidimensional. Thanks to the women who came before us and paved the way, we can create the lives we want to lead—which look different for each of us. I've been fortunate to be able to build my career around my passions, from real estate to fashion. But my professional titles only begin to describe who I am and what I value. I have been an executive and an entrepreneur, but also—and just as importantly—a wife, mother, daughter, and friend. To me, "work" encompasses my efforts to succeed in all of these areas. After appearing on *The Apprentice* years ago and receiving a flood of letters from young women asking for guidance, I realized the need for more female leaders to speak out publicly in order to change the way society thinks and talks about "women who work." So I created a forum to do just that. This book evolves the conversation that started on [IvankaTrump.com](http://IvankaTrump.com), where so many incredible women (and men!) have shared their experiences, advice, ambitions, and passions. Women who work lead meetings and train for marathons. We learn how to cook and how to code. We inspire our employees and our children. We innovate at our current jobs and start new businesses. Women Who Work will equip you with the best skills I've learned from some of the amazing people I've met, on subjects such as identifying opportunities,

shifting careers smoothly, negotiating, leading teams, starting companies, managing work and family, and helping change the system to make it better for women—now and in the future. I hope it will inspire you to redefine success and architect a life that honors your individual passions and priorities, in a way only you can. \* The Ivanka M.
