The Naked Farmer Mar 18 2021 Ben Brooksby is a fifth-generation farmer from St Helens Plains in western Victoria. When he was younger, he struggled with anxiety and other mental health issues, as do so many others in rural communities. A simple social media post helped him to turn things around. After he shared a photo on Instagram showing himself naked in a truck full of lentils, he received a huge response, with other farmers wanting to share their own photos - and their stories. As the Naked Farmer movement grew, Ben met people from all around the country who wanted to get naked for mental health. As they got their kits off, they also opened up about their struggles. This is a heartwarming, moving and candid collection of stories of the challenges our farmers are facing, and the way these communities are banding together in response. Proudly supporting the Royal Flying Doctors Mental Health Service

The Amish Quiltmaker's Unruly In-Law Sep 11 2020 Moving to a new Amish settlement in small-town Colorado was a brave new start for independent-minded quiltmaker Esther Kiem. But helping her reckless relative will really put her special matchmaking skills to the test . . . Mischievous and rebellious, young Ben Kiem is making the wrong kind of name for himself throughout the town of Byler. And even though his sister-in-law, Esther, somehow coaxes him into keeping company with sensible Linda Eicher, Ben can't see anything they have in common. Or that he could ever be good enough for someone like her. But Linda's down-to-earth nature and unexpected understanding have Ben trying his best to be better, no matter how challenging . . . Linda couldn't be more surprised when Ben turns out to be caring and helpful, despite his rowdy pranks and bad-news friends. And falling in love with him suddenly seems just right. But when a heartbreaking misunderstanding comes between them, both she and Ben must risk enough to trust, stitch the pieces back together—and dare a forever precious happiness. Praise for Jennifer Beckstrand and Abraham “This is an endearing romance that fans of Wanda Brunstetter will love.” —Publishers Weekly

Daydreams of Angels Jul 22 2021 Original and bewitching rewrites of children's stories and fairytales set around World War Two, by the Women's Prize-shortlisted author A cherub breaks all the rules when he spends one night with a girl on earth. Snow White and Rose Red forge a unique way to survive the Paris occupation. A soldier is brought back to life by a toymaker, but he's not grateful. And a child begins the story of a Gypsy and a bear, who have to finish it themselves. These are old stories, but not as you know them. These are set not in the forests of Europe or fantasy worlds, but on the battlefields of World War Two and the wilderness of downtown Montreal. With her blazing imagination, irreverent humour and arresting prose, Heather O'Neill twists them anew: more magical for their realism, more profound for their darkness; captivating, witty and wicked.

Building a Special with Ant Anstead Master Mechanic May 08 2020 Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.

Radio Frequency and Microwave Electronics Illustrated Jun 01 2022 Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

The Upper Half of the Motorcycle Feb 26 2022 Bernt Spiegel's *The Upper Half of the Motorcycle* was a best-selling motorcycling book in its original German with multiple editions and printings to its credit. Now translated into English, its provocative message is available to a wider audience. Spiegel's metaphor considers the rider and the motorcycle as a single unit, the rider being the upper half. Taking a multidisciplinary approach, the author draws on anthropology, psychology, biology, physics, and other disciplines to analyze the theory and function of the man-machine unit. Motorcycle riding is seen as a junction where people have created machines for personal transport and then become so adept at using them that the machine becomes like an extension of the rider himself. The ultimate goal for riders is the integration of the man-machine interface and subsequent skill development to the point of virtuosity. Spiegel considers the various aspects of motorcycle riding that must be understood, practiced, and mastered before virtuosity can be attained. Many anecdotes, supplementary material, and in-depth treatment of specialized topics is contained in sidebars and footnotes. Numerous diagrams and photographs illustrate the book's principles allowing the reader to consider and develop their riding skill set.
