Islamic Philosophy of War and Peace Sep 28 2019 Islam means "peace" and "submission to God." With its ethical system of instruction for a balanced life based on faith and reason, how did this "religion of peace" come to be feared? After the 9/11 tragedy, Islam was judged by many in the West to be a hub of terrorism and a threat to world peace. People everywhere voiced concern over its concepts of war and Jihad. Ashraf traces these and related concepts from their inception in Qur'anic injunctions and the Prophet's precepts to their current interpretation, evaluating them in their spiritual, moral, juridical, and cultural contexts. Misunderstandings about Islam lie at the core of much bitterness and violence. With no central authority to definitively interpret its teachings, misconceptions regarding Islam's ideology of war and peace abound. To label Islam as militant is to misinterpret jihad as simply a call to war and to ignore its laws governing warfare, which emphasize restraint as far as possible. Islamic Philosophy of War and Peace explains the spirit of Islam, its mandate for peace, and what the pluralistic notion of jihad stands for in the hope that clearing up ambiguities will foster peaceful relations between Muslims and the rest of the world.

The Philosophy of Psychology Jan 01 2020 What is the relationship between common-sense, or 'folk', psychology and contemporary scientific psychology? Are they in conflict with one another? Or do they perform quite different, though perhaps complementary, roles? George Botterill and Peter Carruthers discuss these questions, defending a robust form of realism about the commitments of folk psychology and about the prospects for integrating those commitments into natural science. Their focus throughout the book is on the ways in which cognitive science presents a challenge to our common-sense self-image - arguing that our native conception of the mind will be enriched, but not overturned, by science. The Philosophy of Psychology is designed as a textbook for upper-level undergraduate and beginning graduate students in philosophy and cognitive science, but as a text that not only surveys but advances the debates on the topics discussed, it will also be of interest to researchers working in these areas.

The book refers to a contextual contribution of a large number of Indian scientists and artists and proves that there is no age bar to blossom. Pathways to Greatness Aug 27 2019 What makes a nation great? Is it simply economic prosperity and military strength -- or something more? What is it that we as a nation require to make that last-mile journey to what all the plans, investments and projects are meant to lead up to? It is only a matter of time before India is termed economically developed. But a nation has to learn to survive in tough times too. And for that what is most important is national character, born out of the value systems that exist in our families, what schools teach students, and the culture of the nation. In Pathways to Greatness, A.P.J. Abdul Kalam shifts focus from the economic development of India by 2020 to the development of our strengths, offering key lessons that will help India withstand the forces of change. He identifies what makes a nation great and also compares the standards of living of other nations with India's. He draws on his travels and his interactions with people. He evolves unique oaths for citizens from all walks of life to ensure that a better life becomes possible for everyone. In the book he completed just a few months before he passed away in 2015, one of India's best-known icons writes how our nation can become a leader on the pathways to greatness.

Turning Points Mar 27 2022 It was like any other day on the Anna University campus in Chennai. As I was returning to my room in the evening, the vice-chancellor, Prof. A. Kalanidhi, fell in step with me. Someone had been frantically trying to get in touch with me through the day, he said. Indeed, the phone was ringing when I entered the room. When I answered, a voice at the other end said, 'The prime minister wants to talk with you.' Some months earlier, I had left my post as Principal Scientific Adviser to the Government of India to return to teaching. Now, as I spoke to the PM, Atal Bihari Vajpayee, my life was set for an unexpected change. Turning Points takes up the incredible Kalam story from where Wings of Fire left off. It brings together details from his career and presidency that are not generally known as he speaks out for the first time on certain points of controversy. It is a continuing saga, above all, of a journey - individual and collective - that will take India to 2020 and beyond as a developed nation.

Target 3 Billion Jun 29 2022 Half the world's population-3 billion people-are below the poverty line, and 70 per cent of the world's poor live in rural areas. Target 3 Billion encapsulates Dr A.P.J. Abdul Kalam's mission to eradicate poverty from the world. With 750 million people living in villages, India has the largest rural population in the world. Based on his Indian experience, Dr Kalam recommends a sustainable and inclusive development system called PURA-Providing Urban Amenities in Rural Areas-to uplift the rural poor not by subsidies but through entrepreneurship with community participation. To make his case, Dr Kalam cites the examples of individuals and institutions, in India and from across the world, who, with an entrepreneurial spirit and a burning desire to make a difference, have successfully generated and tapped into the potential of the rural masses. Fabio Luiz de Oliveria Rosa changed the face of the rural district of Palmares, Brazil, by acquiring for the farmers access to electricity and water, which effect, combined with better agricultural methods, led to an increase in prosperity and stemmed the migration to cities. The 123-strong Magar clan owned Magarpatta, a 430-acre plot on the outskirts of Pune, Maharashtra. In the 1990s, they organized and set up the Magarpatta city which is now home to over 35,000 residents and a working population of 65,000 and boasts of an IT park. Targets 3 Billion tells the story of the brilliantly envisaged global sustainable development system that is PURA, outlining Dr Kalam's vision for every individual and organization-a vision that can create 3 billion empowered, productive and healthy citizens, and generate 3 billion smiles. Causality Jul 27 2019 This book examines the concepts of cause and effect from two dimensions. The first concerns the macrocosm of the Universe and how each belief system views creation. The second dimension explores the ways in which beliefs about creation influence the microcosmic world in terms of the nature of the self, the proximate goals within each system, the answers each belief system offers to the presence of evil and suffering in existence, and ideas about the ultimate goal of release from them. All these ideas inform and are fundamental to the understanding of the present-day practices of different faiths, presenting challenges for scriptural testimony balanced with existential living. The final two chapters explore current research in physics concerning the beginnings of the cosmos and what implications such research might have for existence within it, with the final chapter examining scientific views of the nature of the self. Contents include: Judaic and Christian Traditions. Islam. Hinduism. Early Buddhism. Sikhism. Classical Taoism. Recycled Stardust. Ashes to Ashes and Dust to Atoms: The Life and Death of the Self.
