Patenting

Biotechnical

Innovation Feb 06

2021 This book examines patent law and policy in biotechnology across the full lifecycle of the patent, focusing on the patent bargain and the public interest. It considers the central issues of how to strike an effective balance of rights, and whether public interest is adequately safeguarded - two issues that are particularly important in areas of rapidly emerging

technology.

Eurovision and Australia Jul 11

2021 This book investigates Australia's relationship with the Eurovision Song Contest over time and place, from its first screening on SBS in 1983 to Australia's inaugural national selection in 2019. Beginning with an overview of Australia's Eurovision history, the contributions explore the contest's role in Australian political participation and international relations; its significance for Australia's diverse communities, including migrants and the LGBTQIA+ community; racialised and gendered representations of Australianness; changing ideas of

liveness in watching the event; and a reflection on teaching Australia's first undergraduate course dedicated to the Eurovision Song Contest. The collection brings together a group of scholar-fans from a variety of interdisciplinary perspectives — including history, politics, cultural studies, performance studies, and musicology — to explore Australia's transition from observer to participant in the first thirty-six years of its love affair with the Eurovision Song Contest.

Carchemish in Context May 29 2020 The city of Carchemish in the valley of the Euphrates river can

be regarded as one of the iconic sites in the Middle East, a mound complex known both for its own intrinsic qualities as the seat of later Hittite power and Neo-Hittite kings, but also because its history of excavations included well known historical figures such as Leonard Woolley and T. E. Lawrence. However, because of its location within the military zone of the Turkish-Syrian border the site itself has been inaccessible to archaeologists for more than 90 years. **Carchemish in Context** summarises the results of regional investigations conducted within the Land of

Carchemish Project in Syria, as well as other archaeological surveys in the region, in order to provide a regional, historical and archaeological context for the development of the city. A synthesis of the history of Carchemish is presented and a regional overview of the Land of Carchemish as it is defined by archaeological features and key historical references through to the early Iron Age. Insightful snapshots of the dynamics of an ancient state are revealed which can now be seen to have fluctuated dramatically in size throughout 700-800 years, in part,

depending upon the power of the king of Carchemish or the aggressions of external powers. The results from the Project provide an overview of the main trends of settlement in the region over 8000 years, using a combination of survey databases to both north and south of the Syrian-Turkish border and with a focus on the earlier phases of settlement from the Neolithic until the end of the Bronze Age when Carchemish became an outpost of the Hittite empire. The Iron Age is a period blessed by numerous historical records some of which can be traced in the modern landscape. Further chapters explore

site-specific aspects of the regional archaeology, including a series of important sites on the Sajur river, some of which were positioned along the main campaign routes of the Assyrian kings. The close relationship between the nearby Early Bronze Age site of Tell Jerablus Tahtani and Carchemish are examined and the results from the 40 ha Carchemish Outer Town survey described, providing important new data sources regarding the layout, defenses and dates of occupation of this significant part of the city. The Classical, Roman, Byzantine and Early Islamic occupations are also discussed

in relation to what is known of occupation in the surrounding region.

Tettigoniidae of
Australia Volume 3
May 09 2021 This
third volume in the
series will assist
with identification
and study of this
important genus.
Specialised
collecting
techniques, and the
rearing of immature
specimens, have
yielded many more
species than would
otherwise have
been recorded
using only normal
collecting
techniques. The
work accounts for
four subfamilies,
two of which, the
Tympanophorinae
and
Microtettigoniinae,

are endemic to
Australia. Each of
these endemic
subfamilies is
represented by a
single genus
containing several
species.
Tettigoniidae of
Australia Volume 3
will be a valuable
resource for
orthoptera
researchers and
academics, general
entomologists, as
well as those with
an interest in the
ecology and
conservation issues
related to
grasshoppers.

Challenging
Climate Change Jan
05 2021
Throughout history,
climate change has
been an important
driving force

behind human
behaviour. This
archaeological
study seeks to
understand the
complex
interrelations
between that
behaviour and
climatic
fluctuations,
focussing on how
climate affected the
social relations
between
neighbouring
communities of
occasionally
differing nature. It
is argued that
developments in
these relations will
fall within a
continuum between
competition on one
end and
cooperation on the
other. The adoption
of a particular
strategy depends
on whether that
strategy is
advantageous to a
community in terms

of the maintenance of its well-being when faced with adverse climate change. This model will be applied to northern Mesopotamia between 3000 and 1600 BC. Local palaeoclimate proxy records demonstrate that aridity increased significantly during this period. Within this geographical, chronological, and climatic framework, this study looks at changes in settlement patterns as an indication of competition among sedentary agriculturalist communities, and the development of the Amorite ethnic identity as reflecting cooperation among sedentary and more mobile pastoralist

communities. British Parliamentary Election Results 1983-1997 Nov 15 2021 First published in 1999, this is the sixth volume in a series of definitive reference books recording constituency election results. This volume gives the 1983, 1987 and 1992 general election results in each constituency as well as the outcome of any by-elections which took place up until the dissolution of parliament in 1997. The name, party label, votes and vote share for each candidate are shown. The change in party vote share between elections helps chart the ebb and flow of

electoral opinion throughout this period. Each constituency result also lists the electorate and turnout for each election as well as showing the winner's majority, both in terms of votes and percentage lead over the second placed candidate. Summary statistics for the three general elections record votes cast and seats won across the nations of the United Kingdom. A comprehensive index will allow the reader to identify which candidates fought which constituency in their efforts to be elected to the House of Commons.

European

Agencies Apr 08

2021 European agencies have been created at a rapid pace in recent years in a multitude of highly pertinent and sensitive fields ranging from pharmaceuticals and aviation safety to chemicals or financial supervision. This agency

phenomenon shows no signs of relenting, and the trend in recent years is towards the delegation of ever-broader powers. These bodies, meant to operate at arm's length from political control, have real power and their opinions and decisions can have a direct impact on individuals.

Downloaded from prudentialewards.com on November 27, 2022 by guest

regulators, and member states. Given the powers wielded by the agencies, who is responsible for holding these non-majoritarian actors to account? Is the growing concern surrounding agency accountability 'much ado about nothing' or are we faced with the threat of a powerful and unaccountable bureaucracy? These are precisely the questions that this book seeks to answer. It thus addresses one of the most relevant topics in current European governance: the accountability of European agencies. Scholars have increasingly called attention to the risk of placing too much power in the hands

of such agencies, which operate at arm's length from traditional controls and cannot easily be held accountable for their actions. Although this is a major issue of concern, systematic empirical research into the topic is lacking. This book addresses empirically whether, and if so on what counts, agency accountability is problematic. It examines how the accountability system of European agencies operates at both the de jure as well as the de facto level, through an examination of legal provisions, relevant case law as well as policy documents and extensive interview material. Reflecting

on these findings, the book also offers important theoretical insights for our understanding and study of accountability in a complex regulatory regime such as the EU context. The book follows a multi-disciplinary approach and is at the cutting edge of law and public administration.

risk management by banks in order to determine how certain crisis scenarios would affect the value of their portfolios, and by public authorities for financial stability purposes. Until the first half of 2007, interest in stress-testing was largely restricted to practitioners. Since then, the global financial system has been hit by deep turbulences, including the fallout from sub-prime mortgage lending. Many observers have pointed out that the severity of the crisis has been largely due to its unexpected nature and have claimed

that a more extensive use of stress-testing methodologies would have helped to alleviate the repercussions of the crisis. This book analyses the theoretical underpinnings, as well as the practical aspects, of applying such methodologies. Building on the experience gained by the economists of many national and international financial authorities, it provides an updated toolkit for both practitioners and academics.
