Ovid's Revisions Jul 07 2020 A striking feature of Ovid's literary career derives from the processes of revision to which he subjects the works and collections that make up his oeuvre. From the epigram prefacing the Amores, to the editorial notices built into the book-frames of the Epistulae Ex Ponto, Ovid repeatedly invites us to consider the transformative horizons that these editorial interventions open up for his individual works, and which also affect the shape of his career and authorial identity. Francesca K. A. Martelli plots the vicissitudes of Ovid's distinctive career-long habit, considering how it transforms the relationship between text, oeuvre and authorial voice, and how it relates to the revisory practices at work in the wider cultural and political matrix of Ovid's day. This fascinating study will be of great interest to students and scholars of classical literature, and to any literary critic interested in revision as a mode of authorial self-fashioning.

Willful Blindness Feb 23 2022 Margaret Heffernan argues that the biggest threats and dangers we face are the ones we don't see--not because they're secret or invisible, but because we're willfully blind. A distinguished businesswoman and writer, she examines the phenomenon and traces its imprint in our private and working lives, and within governments and organizations, and asks: What makes us prefer ignorance? What are we so afraid of? Why do some people see more than others? And how can we change? Covering everything from our choice of mates to the SEC, Bernard Madoff's investors, the embers of BP's refinery, the military in Afghanistan, and the dog-eat-dog world of subprime mortgage lenders, this provocative book demonstrates how failing to see--or admit to ourselves or our colleagues--the issues and problems in plain sight can ruin private lives and bring down corporations. Heffernan explains how willful blindness develops before exploring ways that institutions and individuals can combat it. In the tradition of Malcolm Gladwell and Nassim Nicholas Taleb, Margaret Heffernan's Willful Blindness is a tour de force on human behavior that will open your eyes.

Corpus Stylistics in Principles and Practice Sep 08 2020 In this book, Yufang Ho compares the text style difference between the two versions of John Fowles' *The Magus*, exemplifying the methodological principles and analytic practices of the corpus stylistic approach. *The Magus* was first published in 1966 and was revised and republished by Fowles in 1977. Fowles' own comment on the second edition was that it was 'rather more than a stylistic revision.' The book explores how the revised version is linguistically different from the original, especially in terms of point of view (re) representation. The corpus stylistic approach adopted combines qualitative and quantitative comparison to confirm the overall text style difference. The analysis demonstrates that computer assisted methods can identify significant linguistic features which literary critics have not noticed and provide a more detailed descriptive basis for literary interpretation of (either edition) of the novel. This analysis of *The Magus* serves as a case study and exemplar of how corpus techniques may be used generally in the study of linguistics.

The Press in New Order Indonesia Dec 12 2020 The Press in New Order Indonesia is the most comprehensive book available in English on the print media during the Suharto presidency. Based on detailed and investigative research, it provides a succinct introduction to the political and economic forces shaping this dominant sector of the Indonesian media at a pivotal time in its development. The study documents the history of the press prior to the rise of President Suharto, surveys the changing New Order policies to the media, and analyses the various modes of control exercised through powerful government agencies and industry bodies. Throughout this critical historical period of political tension and economic transition, The Press in New Order Indonesia traces the development of huge media conglomerates which began to rival military muscle in shaping the media landscape of Indonesia. This study explains how the student press spilled off the campuses to play a unique political role. By contrast, a distinctly Islamic press achieved only very modest success. Focusing on Indonesian-language national daily newspapers, it also discusses news weeklies, periodicals and magazines, as well as publications in regional languages, English and Chinese. Brought back to life in Equinox Publishing's Classic Indonesia series, The Press in New Order Indonesia is required reading for students of Indonesian languages and cultures, Asian studies, Southeast Asian studies, media studies, journalism, and contemporary politics. David T. Hill is Professor of Southeast Asian Studies and Fellow of the Asia Research Centre, Murdoch University, Perth, Western Australia.

Obvious Adams -- The Story of a Successful Businessman Oct 02 2022 OBVIOUS ADAMS was first published as a short story in the Saturday Evening Post in April, 1916. Though it was the story of an advertising man, it was quickly recognized as presenting a germ idea basic to outstanding success in the business world and the professions. Harper & Brothers brought out the story in book form in September of the year of its publication in the Post. The book met with a ready sale. In reviewing it, the New York Times said, "The young man who is going to seek his fortune in the advertising business should have Obvious Adams for a handbook. Indeed, any young man who is going to seek his fortune in anything might be aided by the common sense and business acumen displayed in this little volume." "Obvious Adams" soon became a legendary character. He was quoted in business conferences and at board meetings. Heads of companies wrote the author to ask if the hero of the story was a real person; that if he was they wanted to engage his services. His "obviousness" influenced the thinking of some of the outstanding industrial leaders of the day. Fun Way Learning Press is now proud to publish a new Business Edition of this classic text, updating some of the author's original usage and including a Manager's Toolkit for the business owner or executive who wants to leverage the "obvious" in his or her own business.

Necessary But Not Sufficient Jan 13 2021 After reading the newspapers and following the sharp oscillations of the stock market, it becomes apparent that hi-tech companies are of a different breed. Never before have the chances of making a fortune been so realistic and never before have large companies been so fragile. What is really going on inside these hi-tech companies? What types of pressures and challenges are they facing? And how do they cope? Computer software providers, especially the ones that specialise in handling the data needs of organizations, are prime examples of these volatile companies. In the nineties we witnessed their growth from small businesses into multi-billion dollar giants. No wonder investors were attracted. In 1998 it was easy for such companies to raise as much money as they wanted. But now, investment funds have dried up. Why? And more importantly, is there a way to reverse the trend? This book gives the answers.

The Innateness of Myth Jul 19 2021 Joseph Campbell (1904-1988) was one of the most well-known and popular scholars of myth and comparative religion of the twentieth century. His work, however, has never fully received the same amount of scholarly interest and critical reflection that some of his contemporaries have received. In this book, based on extensive research in the Joseph Campbell Archive in Santa Barbara, Ritske Rensma shows that reflecting on C.G. Jung's influence on Campbell greatly furthers our understanding of these ideas, and that once this goal is achieved it becomes obvious that Campbell was a scholar whose ideas are still of significance today. Following Jung's lead, Campbell put great emphasis on the innate structures of the mind, an approach which pre-echoes the current 'evolutionary turn' in fields such as cognitive theory, psychology, psychiatry and neurobiology. This study will therefore not just be of interest to students and scholars interested in psychological approaches to the study of religion as well as Jung and Campbell, but also to those with an interest in recent developments in the above-mentioned fields

Everything is Obvious Oct 10 2020 Why is the Mona Lisa the most famous painting in the world? Why did Facebook succeed when other social networking sites failed? Did the surge in Iraq really lead to less violence? And does higher pay incentivize people to work harder? If you think the answers to these questions are a matter of common sense, think again. As sociologist and network science pioneer Duncan Watts explains in this provocative book, the explanations that we give for the outcomes that we observe in life—explanations that seem obvious once we know the answer—are less useful than they seem. Watts shows how commonsense reasoning and history conspire to mislead us into thinking that we understand more about the world of human behavior than we do; and in turn, why attempts to predict, manage, or manipulate social and economic systems so often go awry. Only by understanding how and when common sense fails can we improve how we plan for the future, as well as understand the present—an argument that has important implications in politics, business, marketing, and even everyday life.

Tax Revision Compendium, 86-1, November 16, 1959 Nov 30 2019

The Last New Dealer Aug 27 2019 In 1992, A "no-shot" candidate runs for president in the New Hampshire Democratic Primary, while telling the story of how the United States evolved from 13 small, scattered, quarreling British colonies along the Atlantic Coast into the most powerful nation in history. With a definite, clear and unique message, the candidate and his handful of helpers, who include a recovering alcoholic who once worked for Jimmy Carter's campaign; a young waitress, who was a star basketball player in high school, but fell into a deep depression caused by an episode in her senior year; a retired New Hampshire newspaper publisher; plus some former employees from his years as a newspaper publisher, he manages to win the most votes on Primary night. He goes from New Hampshire, to win the Maine caucus, the Georgia Primary and following an assassination attempt which kills one of his associates, he wins Florida and comes close in New York, making him the leading candidate for the Democratic nomination. The candidate stresses that the strong U.S. central government is still the best one ever conceived and that it is "the answer, not the problem," and has been the essential factor in the nation's three great transformative crises: the American Revolution in which the colonies declared independence from England; The Civil War, which established that the states were indeed one nation, not just a

collection of "un-united" states; and thirdly the New Deal, which rescued the U.S. from economic depression, prepared it to be the decisive power in winning World War II, and laid the foundation for the modern U.S. and, to a great extent, the modern world. The threat of a third-party effort by Ross Perot throwing the election to the House of Representative, persuades him to withdraw and support the better financed and organized Bill Clinton for the November election. This history is delivered in a dramatic fictional saga written in a newspaper style, which makes it easy to digest for the average reader. Its characters are well-defined, and its narrative plausible in the final analysis. It is anti-war, pro-democracy and advocates political campaigns without a lot of consultants and image-makers.

Non-Obvious Sep 01 2022 The sad truth about most trend predictions is that they seem to focus on restating the blatantly obvious. Predicting the "rise of wearable technology" in 2015 is a bit like predicting the ground will be wet the day after a rain storm ... it is undoubtedly true - but relatively useless to hear out loud. Five years ago, longtime brand consultant and marketing Professor Rohit Bhargava began producing his annual "Non-Obvious Trend Report" where he curated 15 trends to describe consumer behavior, marketing and where business was headed in the new year. His previous reports predicted the growth of content marketing, real time customer care and more transparency in business. To date, they have been downloaded and shared online more than half a million times. In this 5th Edition of his annual report, he takes readers behind the scenes for the very first time ever to share his techniques for curating trends and the five essential skillsets required in order to be able to predict the future for yourself. Through entertaining stories, deep analysis and a surprisingly simple approach - Rohit proves that even though we imagine trend forecasting is done only by business gurus ... each of us can get better at curating trends for ourselves as long as we know what to look for.
