Aircraft Recognition Oct 12 2020 When this book was first published in 1941, aircraft recognition was far more than just a pleasant pastime; it was often a matter of life and death... This classic text provides a definitive catalogue of the aeroplanes, enemy and friendly, seen over British skies during the Second World War. R.A. Saville-Sneath set out to produce a handy classification guide, with many diagrams, a full glossary and some useful mnemonics, showing how each type of aircraft could be identified quickly and easily. The basic structures, tail units, positions of the wings and engines, and even the sounds made by the different planes, form part of the essential 'vocabulary' for distinguishing Albacores and Ansons, Beauforts and Blenheims, Heinkels, Hurricanes and Junkers, Messerschmitts and Moths, Spitfires and Wellingtons. For anyone interested in aviation the book provides a mine of information about a golden age. For those who lived through one of the most glorious episodes in the history of combat it will prove vividly evocative of those extraordinary days.

The Women with Silver Wings Oct 31 2019 "With the fate of the free world hanging in the balance, women pilots went aloft to serve their nation. . . . A soaring tale in which, at long last, these daring World War II pilots gain the credit they deserve."—Liza Mundy, *New York Times* bestselling author of *Code Girls* "A powerful story of reinvention, community and ingenuity born out of global upheaval."—*Newsday* When the Japanese attacked Pearl Harbor in December 1941, Cornelia Fort was already in the air. At twenty-two, Fort had escaped Nashville's debutante scene for a fresh start as a flight instructor in Hawaii. She and her student were in the middle of their lesson when the bombs began to fall, and they barely made it back to ground that morning. Still, when the U.S. Army Air Forces put out a call for women pilots to aid the war effort, Fort was one of the first to respond. She became one of just over 1,100 women from across the nation to make it through the Army's rigorous selection process and earn her silver wings. The brainchild of trailblazing pilots Nancy Love and Jacqueline Cochran, the Women Airforce Service Pilots (WASP) gave women like Fort a chance to serve their country—and to prove that women aviators were just as skilled as men. While not authorized to

serve in combat, the WASP helped train male pilots for service abroad, and ferried bombers and pursuits across the country. Thirty-eight WASP would not survive the war. But even taking into account these tragic losses, Love and Cochran's social experiment seemed to be a resounding success—until, with the tides of war turning, Congress clipped the women's wings. The program was disbanded, the women sent home. But the bonds they'd forged never failed, and over the next few decades they came together to fight for recognition as the military veterans they were—and for their place in history.
