**Jurassic World: The Ultimate Pop-Up Book Mar 07 2021** Life will not be contained in this exciting and interactive pop-up journey through the entire Jurassic saga—from pop-up legend Matthew Reinhart. The hit Jurassic World series recaptured audiences globally when it unleashed an island of new and terrifyingly realistic dinosaurs on the world. Inspired by director Steven Spielberg's 1993 classic Jurassic Park, the iconic saga has ushered in a whole new generation of film fans. Featuring explosive, pop-off-the-page depictions of the Tyrannosaurus rex, Velociraptor, and other prehistoric favorites, this deluxe pop-up book traces the evolution of the Jurassic Park and Jurassic World sagas across three decades of major motion pictures. Presented in a dynamic 360-degree format that allows fans to view and participate in the action from all sides, Jurassic World: The Ultimate Pop-Up Book also includes interactive pull-tabs and hidden surprises. Bigger than a T. rex and smarter than a Raptor, Jurassic World: The Ultimate Pop-Up Book is the definitive interactive exploration of the most gargantuan saga in movie history.

**Geological Pioneers of the Jurassic Coast Jun 17 2019** The Jurassic Coast in the United Kingdom is a World Heritage Site and one of the most significant geological and geomorphological locations on earth. Its geology, which dates from the Triassic through the Cretaceous Ages, features a remarkable fossil record, including the remains of dinosaurs. The Jurassic Coast also boasts extraordinary landforms, such as huge landrips, raised beaches, dry valleys, shingle barriers, and coastal lagoons. Many leading geologists, geomorphologists, and paleontologists have worked in the area, making the Jurassic Coast a nexus for the study of earth science. Geological Pioneers of the Jurassic Coast describes the importance of the site and examines the lives and achievements of over forty individuals who studied it. Progressing chronologically, the book tells the stories of early researchers, fossil collectors, geological mappers, stratigraphers, and paleontologists from the seventeenth century to today. These include such groundbreaking figures as Robert Hooke, Mary Anning, William Buckland, William Conybeare, Henry De La Beche, W.J. Arkell, and Joseph Prestwich. Written to appeal to both specialists and general readers, Geological Pioneers of the Jurassic Coast will be of interest to historians of science, geologists and geomorphologists, and students and visitors to the area.

**Jurassic Rhynchonellids Jan 25 2020** Jurassic brachiopods of the order Rhynchonellida are classified according to modern concepts and techniques, with special attention to internal structures. They are grouped into 6 families and 16 subfamilies of which three are new: the Acanthorhynchiniinae, the Cryptorhynchiniinae, and the Piarorhynchiniinae. Subfamilies emended or revised are the Acanthorhynchiniinae Schuchert (1913) raised to family rank, Davanirhynchiniinae Ovtsharenko (1983), Dzhangirhynchiniinae Ovtsharenko (1983), Erymariiniinae Cooper (1959), Indorhynchiniinae Ovtsharenko (1975), Septocurelliniinae Ager, Childs, and Pearson (1972), and Striirhynchiniinae Kamyshan (1968). New genera are Aalenirhynchia (type-species Rhynchonella subdecorata Davidson, 1853), Bradfordirhynchia (type-species Cryptorhynchia bradfordensis Buckman, 1918), and Sharpirhynchia (type-species Kallirhynchia sharpi Muir-Wood, 1938). A new subgenus is Burmirhynchia (Hopkinsirhynchia) (type-species Burmirhynchia hopkinsi Davidson, 1854). The only new species is Pycnorhynchia depressa. Eleven genera are revised, and many are transferred among the subfamilies; lectotypes are designated where needed.

Through rare and never-before-seen imagery and exclusive interviews with key creatives, this deluxe volume explores the entire creative process, from the films' stunning dinosaur designs to the epic location shoots and the creation of the films' incredible visual effects. Fans will also discover a fascinating look at the wider world of the saga, including the Netflix animated series Jurassic World: Camp Cretaceous, video games, toys, theme park attractions, and more. Unearth the story behind the making of the Jurassic World trilogy with this definitive collector's book, a must-have for fans of the action-packed saga.

**Walking the Jurassic Coast Jan 17 2022** This guidebook describes 30 walking routes along the Devon-Dorset coast. The majority of the routes hug the shoreline between Torbay and Swanage, while others venture inland on the Dorset Downs. The walks range in length from 3 to 20 miles (5 to 33km) and are suitable for most walkers, with shorter routes alongside plenty of more challenging, full-day hikes. As well as detailed descriptions for every walk, accompanied by OS maps, there are details on available parking, points of interest along the way and advice on the terrain covered. The guide has been divided into areas: Devon's Red Beds, the Lias, Chesil Beach, Chalk walks (Lulworth and inland) and the Isle of Purbeck. The geological descriptions are accompanied by strata diagrams, geological timelines, explanations of the creation of the various sedimentary rocks along the coast, and discussion of how and why the various formations formed millennia ago. The incredible - yet readable - detail brings these walks and the landscape alive. The Jurassic Coast of Devon and Dorset, stretching between Exeter and Bournemouth, is a geological wonderland. Natural wonders like Chesil Beach, Durdle Door and fossils so numerous you'll be tripping over them, combine with southern England's rolling Downs, tiny villages, beaches and sunny summers to provide a stunning and awe-inspiring landscape to explore.

**Jurassic Park Sep 25 2022** Before seeing Jurassic World film this June read the original, multimillion copy No. 1 bestselling thriller that inspired the first major motion picture Jurassic Park. On a remote jungle island, genetic engineers have created a dinosaur game park. An astonishing technique for recovering and cloning dinosaur DNA has been discovered. Now one of mankind's most thrilling fantasies has come true and the first dinosaurs that the Earth has seen in the time of man emerge. But, as always, there is a dark side to the fantasy and after a catastrophe destroys the park's defence systems, the scientists and tourists are left fighting for survival... With this masterful cross of science fiction and action-adventure, Michael Crichton created one of the biggest bestsellers of all time, turned by Steven Spielberg into the highest grossing blockbuster ever in 1993.

**Southern Hemisphere Palaeobiogeography of Triassic-Jurassic Marine Bivalves Sep 01 2020** Palaeobiogeography is a complex subject which processes information provided by both Biology and Earth Sciences. It is conceptually and philosophically equivalent to neobiogeography. Nevertheless, its methods are somewhat different, since it is limited by the incompleteness of the fossil record. On the other hand, it has direct access to the time dimension, a key ingredient of organic evolution. Mesozoic benthonic mollusks, and especially bivalves, have a great potential for palaeobiogeographical analysis due to their commonly good preservation, abundance, diversity and high dispersion potential at the larval stage. From a merely descriptive point of view, the analysis of their distribution shows latitudinal gradients and distributional patterns, both at regional and global scales, which are the basis for the recognition of biocoenoses or palaeobiogeographical units of different ranks. Moving forward towards a causal palaeobiogeography, these organisms also provide interesting insight into particular biogeographical questions, such as bipolarity and its origin. The evolution in time of the recognized biocoenoses can be discussed in relation to palaeoclimas and extinction events. Finally, some of the results obtained from the analysis of the distribution of past bivalve biotas were even used to propose and discuss the development of marine corridors and argue about the distribution of continents in the past.

**Jurassic West, Second Edition Jun 10 2021** The famous bone beds of the Morrison Formation, formed one hundred and fifty million years ago and running from Wyoming down through the red rock region of the American Southwest, have yielded one of the most complete pictures of any ancient vertebrate ecosystem in the world. Jurassic West, Second Edition tells the story of the life of this ancient world as scientists have so far been able to reconstruct it. Aimed at the general reader, Jurassic West, Second Edition recounts the discovery of many important Late Jurassic dinosaurs such as Apatosaurus, Allosaurus, and Stegosaurus. But dinosaurs compose barely a third of the more than 90 types of vertebrates known from the formation, which include crocodiles and turtles, frogs and salamanders, dinosaurs and mammals, clams and snails, and ginkgoes, ferns, and conifers. Featuring nearly all new illustrations, the second edition of this classic work includes new taxa named since 2007, updates to the naming and classifications of some old taxa, and expanded sections on numerous aspects of Morrison Formation paleontology and geology.

**Jurassic World May 21 2022** When the scientists at Jurassic World engineer a new, more deadly dinosaur, things go awry and everyone at the park is in danger.

**The Middle and Late Jurassic Intraself Basin of the Eastern Arabian Peninsula Jul 19 2019** This memoir provides a thorough review of the geology of the rimmed Arabian Intraself Basin, reconciling differing interpretations of lithostratigraphy, sequence stratigraphy and biostratigraphy. Variation of energy levels and facies due to its setting in the SE palaeotrade wind belt are described. The roles subtle tectonism played in developing the basin and in the Late Jurassic creating restriction by uplift and exposure of the Tethys shelf are evaluated. The intraself basin formed during rising sea level as a single rimmed carbonate intraself basin. A possible global cooling phase resulted in a lowstand which restricted the basin, resulting in petrographically unique carbonate source rock facies dominated by cyanobacterial deposition. Two subsequent 3rd order carbonate sequences largely filled the basin. Eustatic change concomitant with uplift of the Tethys shelf resulted in alternation of carbonates and evaporites (gypsum-anhydrite) across the region. The end result was a sealed intraself basin which preserved early-formed porosity and confined generated hydrocarbons within the intraself basin facies.

**Jurassic Park Jun 29 2020** Dig up the past and jump into action with this captivating prequel to Jurassic Park. Do you have what it takes to unlock the secrets of the Five Deaths? Summer of 1984. Australian forensic Kenneth Turner and his 10 year-old daughter Aileen are flying back home when something terrible happens. After a nightmarish time lost at sea, they are eventually rescued by fishermen off the coast of Central America. Turner and all other survivors are then taken to an island shrouded in mystery. There, they are placed under quarantine. But why are they kept under lock and key in the medical center? And what are those electrified fences for? The crash survivors are going to learn the hard way that a paramilitary group is occupying the premises. The soldiers all work for an enigmatic company called InGen. What is going on in this facility? What are they really up to on site C? Why is the archipelago marked as "maximum security prison" on the maps? Something out of this world is happening on Isla Matanceros, something beautiful and dangerous. Turner and his daughter are going to find themselves at the heart of a hazardous operation involving more than just politics and science. Groundbreaking medical treatments, futuristic food-processing solutions, mass rearing and technology patents are just the tip of the iceberg. What if InGen was hiding a far more spectacular discovery? A discovery that could change the world of genetics forever. But things will not go as planned and the survivors will have to face hardship as South American arms traffickers decide to visit the island. The threat is real. Go back to where it all began, 8 years before the events of Jurassic Park! Find out who the scientists, rangers and InGen workers involved in the creation of the iconic park were. The path is littered with pitfalls and, although the islands look magical, they also turn out to be deadly. Jurassic Park: Dead Islands introduces brand new characters encountering new dinosaur species in hostile territory. How will they tackle these terrifying situations? InGen creatures may be young, but they are definitely lethal... Yet the real monsters may not be the ones roaming the forest. Will Kenneth and Aileen manage to escape safe and sound? Sign the non-disclosure agreement and enter the world of Jurassic Park. The legend unfolds before your very eyes and, like all legends, it's made of blood, sweat and tears. Will you survive the origins of the myth? Includes never-before-seen original artworks by Robert Jack, Aram Papazyan & Yerlik Zharylgapov

**Jurassic Mary Nov 22 2019** Spinster Mary Anning, uneducated and poor, was of the wrong sex, wrong class and wrong religion, but fate decreed that she was exactly the right person in the right place and time to pioneer the emerging science of palaeontology, the study of fossils. Born in Lyme Regis in 1799, Mary learned to collect fossils with her cabinet-maker father. The unstable cliffs and stealthy sea made the task dangerous but after her father died the sale of fossils sustained her family. Mary's fame started as an infant when she survived a lightning strike that killed the three adults around her. Then, aged twelve, she caught the public's attention when she unearthed the skeleton of a 'fish lizard' or Ichthyosaurus. She later found the first Plesiosaurus giganteus, with its extraordinary long neck associated with the Loch Ness monster, and, dramatically, she unearthed the first, still rare, Dimorphodon macronyx, a frightening 'flying dragon' with hand claws and teeth. Yet her many discoveries were announced to the world by male geologists like the irrepressible William Buckland and Sir Henry De La Beche and they often received the credit. In Jurassic Mary Patricia Pierce redresses this imbalance, bringing to life the extraordinary, little-known story of this determined and pioneering woman.
