Police Field Operations Dec 14 2020 This is the eBook of the printed book and may not include

any media, website access codes, or print supplements that may come packaged with the bound book. The authoritative text in police field operations. The result of over two years of revisions, *Police Field Operations, Eighth Edition* brings this essential text up to date with the most recent developments in police practices and procedures. For years, Adams has served as the textbook standard for police departments and academies and academic programs across the country.

Written from the perspective of a working police officer, the text presents the real-life scenarios an officer is likely to encounter while on-duty. It focuses on community policing, details how and why certain procedures are used, and provides instructional techniques from leading police academies.

The Nanjing Massacre: A Japanese Journalist Confronts Japan's National Shame Sep 30 2019 This book is based on four visits to China between 1971 and 1989 by Honda Katsuichi, an investigative journalist for Asahi Shimbun. His aim is to show in pitiless detail the horrors of the Japanese Army's seizure and capture of Nanjing in December 1937. Unvarnished accounts of the testimony - Chinese victims and Japanese perpetrators - to the rape and slaughter are juxtaposed with public relations announcements of the Japanese Army as printed in various Japanese newspapers of the time. The bland announcements of triumphant victories stand in bitter contrast to the atrocities that actually took place on the scene. The story unfolds with horrible detail as we watch the triumphant progress of the Japanese army whose troops were bent on rape and killing in the so-called "heat of battle." Yet by recalling the testimony of Japanese soldiers and reporters who were on the scene, as well as reproducing dispatches by Japanese Army authorities at the time, Honda makes it clear that the atrocities were part of a studied effort directed by the Japanese high command to impress the Chinese people with the power of its army and the folly of resistance to it - the estimate of 300,000 killed in these "military operations" is no exaggeration. Honda has worked with other Japanese journalists and scholars who have attempted to reveal the truth of the Nanjing massacre, provoked by the efforts of right-wing Japanese, including, sadly, many government officials, to whitewash the whole incident, even to the point of contending that a "massacre" never happened. This gripping account of the atrocities and cover-up joins other exposes - Chinese and now German - in keeping alive the memory of this shameful event.

The Army Medical Department, 1917-1941 Apr 17 2021 From the Book's Foreword: Long-awaited, Mary C Gillett's final work *The Army Medical Department, 1917-1941*, complete her four-volume study covering the years from 1775 to 1941. Although the Medical Department had improved medical standards and practices because of the latest advances in scientific medicine and was making significant progress toward creating an organizational structure and a supply system able to handle the demands of a conflict of any size, its reserves of trained personnel and supplies were seriously inadequate when the nation entered world War I in the spring of 1917. The narrative first describes the struggle of an unprepared department to meet the myriad demands of a war unprecedented size and complexity, then follows postwar efforts to meet the needs of the peacetime army during nearly two decades of continental isolationism and budgetary neglect, and finally covers the brief period of growing awareness of America's involvement in another major conflict and the intensive preparation efforts that ensued.
