E-Paper Displays Jan 31 2020 E-PAPER DISPLAYS An in-depth introduction to a promising technology, curated by one of its pioneering inventors Electronic paper (e-paper) has one of the most promising futures in technology. E-paper's potential is unlimited, as the displays require extremely low power and imitate the aesthetic of ink on the page. This allows e-paper devices to have a wider range of viewing angles than traditional LED products and are capable of being viewed in direct sunlight—and without any additional power. As a result, e-paper displays create less eye strain, have a greater flexibility in their use, and have the potential to be used in place of paper for billboard advertising, educational applications, and transport signage, and more. In E-Paper Displays, editor Bo-Ru Yang and his team of experts present a detailed view into the important technologies involved in e-paper displays, with a particular emphasis on how this technology's unique properties make possible a wide range of personal and professional electronic products. As climate change makes efficient energy use more important than ever, e-paper can become an essential tool for future products on a large scale. As we rely more and more on technology, having lightweight devices with long battery life will become critical. This book provides engineers and innovators with an introduction to this important technology and shows new pathways for development. E-Paper Displays readers will also find: The editor is one of the leading pioneers in this technology Contributions from an international team of experts in e-paper technology Descriptions of many advanced display types that rely on different principles than the widely used LCD and OLED types Another innovative title from Wiley-SID (Society for Information Displays) series As we enter a new stage in our industrial development, E-Paper Displays is an essential reference for computer engineers and developers, as well as innovators and scientists, and their students.

Cannabis Apr 03 2020 Over the years, there has been increasing interest into the public health impact of cannabis use, especially by young adults. This follows the evidence of a growing prevalence of regular cannabis use worldwide, with approximately 200 million users. Recreational cannabis use, especially a frequent use of products with high levels of its main psychoactive ingredient delta-9-tetrahydrocannabinol (? 9-THC), can cause dependence and have transient and long-lasting detrimental mental health effects, also negatively impacting cognitive processing and brain function and metabolism. In regular users, the development of tolerance to some of the effects of cannabis, especially the pleasurable ones, may lead to progressively heavier use in order to obtain the same effects in terms of their intensity, with higher health risks. However, the Cannabis Sativa plant contains different chemicals with different potential effects. In this regard, cannabidiol has gained interest because of its potential therapeutic properties, in line with evidence that CBD and ?9-THC may exhibit opposite effects at the cannabinoid receptor type 1 (CB1), ?9-THC being a partial agonist and CBD an antagonist/inverse agonist. Different cannabinoids may modulate human brain function and behavior in different ways, with different risk–benefit profiles.

India Policy Forum 2016–17 May 05 2020 The India Policy Forum (IPF) is India's most prominent annual economic policy conference in the summer season of New Delhi and is organized by NCAER, the National Council of Applied Economic Research. The primary goal of the IPF is to promote original policy and empirical research on India, including policy-focused review articles that seek to define the best economic policy advice based on robust, empirical research. The annual IPF conference provides a unique combination of intense scholarship and expert commentary on commissioned research papers with a strong focus on policy. The revised papers and conference proceedings are published in this volume, including the comments of paper discussants and a summary of the floor discussion on each paper. This 2016-17 IPF volume brings together the papers presented at the 13th IPF Conference held on July 12-13, 2016. The paper by C. Badarinsa, V. Balasubramaniam, and T. Ramadorai presents for the first time an integrated perspective on the balance sheet of Indian households. The paper by R Nagaraj and T. N. Srinivasan unpacks the analytical and data issues underlying the controversy surrounding India's new GDP estimates. The paper by A. Adhvaryu, P. Bharadwaj, and S. Krumholz analyzes India's experience with child health and development, and suggests how policy and programs can be made more effective in this vital area. The paper by S. Chatterjee and D. Kapur raises troubling questions about the performance of Indian agriculture and highlights six puzzles, related among other things to the political economy, trade, and productivity of Indian agriculture. The final paper synthesizes knowledge and weighs the evidence from an array of studies on India's National Rural Employment Guarantee Scheme, the world's largest workfare program.
